

Ways To Be More Eco Friendly

Invest In Renewable Energy For Electricity

A way that households can be more eco friendly is to invest in a renewable energy source for electricity.

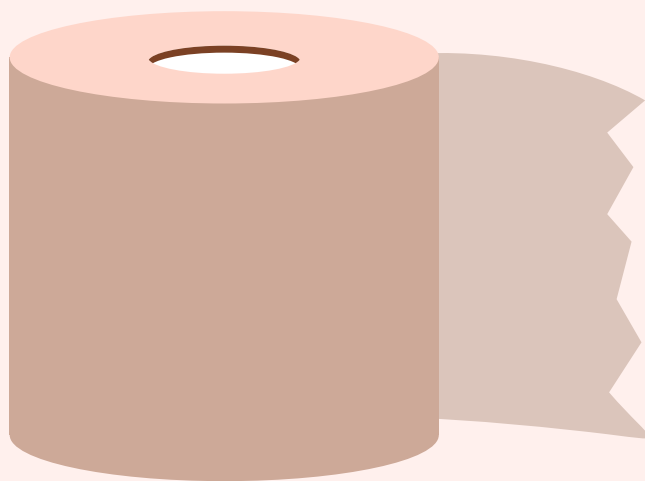

Switch Heating Source

Try heat pumps as they also provide heating options for the home. Heat pumps are not only more environmentally friendly due to their low energy consumption.

Use Eco-Cleaning Products To Clean The House

Eco-friendly household products are products that contain sustainably grown or raised ingredients that do not damage the ecosystem, or damage it when re-released.

Use Eco Friendly Toilet Paper

Consumers can use eco-friendly toilet paper made from bamboo. Because bamboo grows 39 inches in a 24-hour period, toilet paper made from bamboo is a much more sustainable option than regular toilet paper.

Use A Recyclable Eco Friendly Water Bottle

Reusable And Portable Water Bottles are the solution, saving you money in the long run, as fewer plastic bottles need to be purchased.

TAKE CARE OF YOUR ENVIRONMENT, TAKE CARE OF THIS WORLD
