

FAR BEYOND THE WORLD

Lachlan
Armstrong ✨

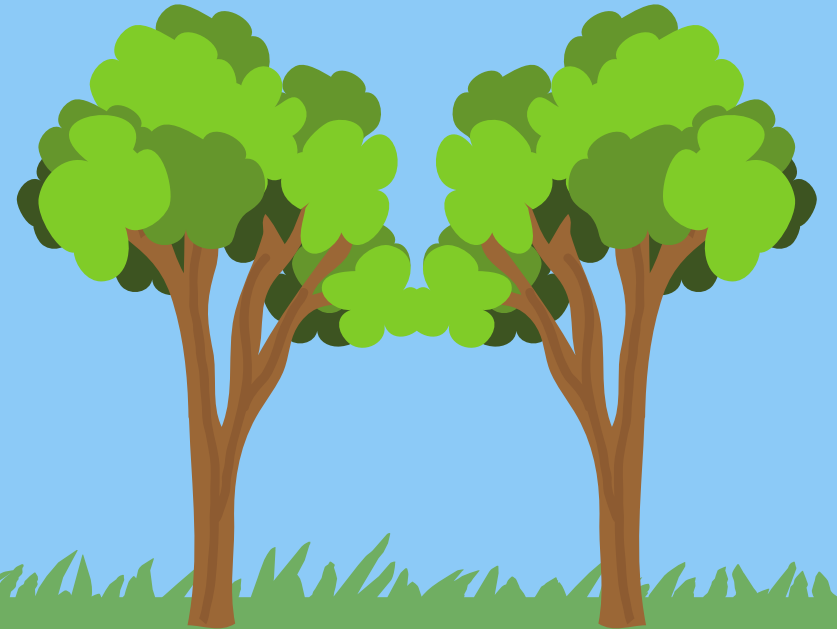

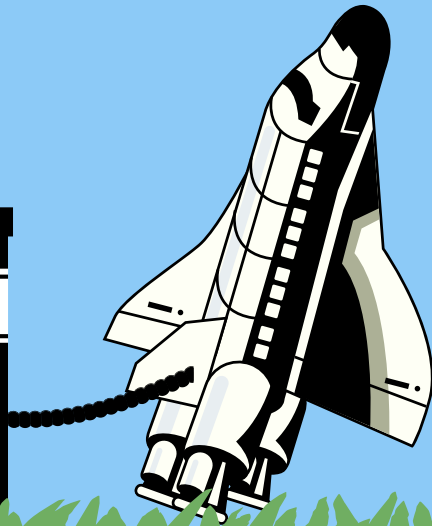

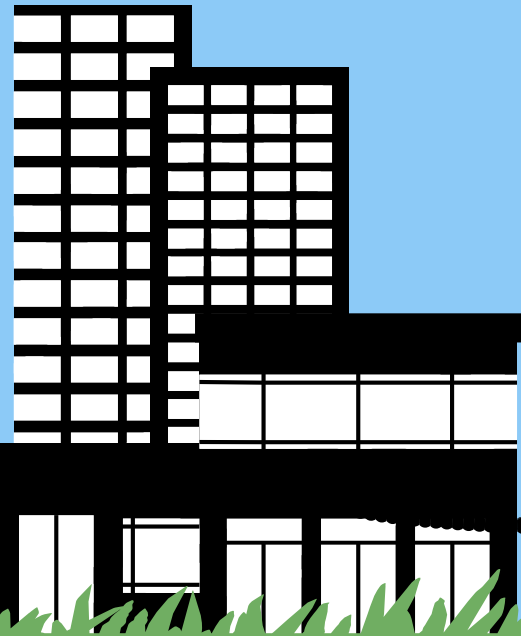

This book is dedicated to Renee, Steve,
Josh and Lucy

This is the astronaut. He is ready to go to space and all eyes are set, waiting for what is going to happen. The astronaut is brave, strong and especially kind. The astronaut was ready and he saw hundreds of people watching him go to space

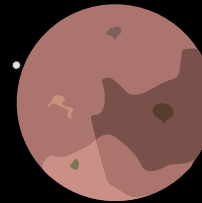

**Everyone is waiting
impatiently as the
countdown is set and
ready to go in 5.4.3.2.1!**

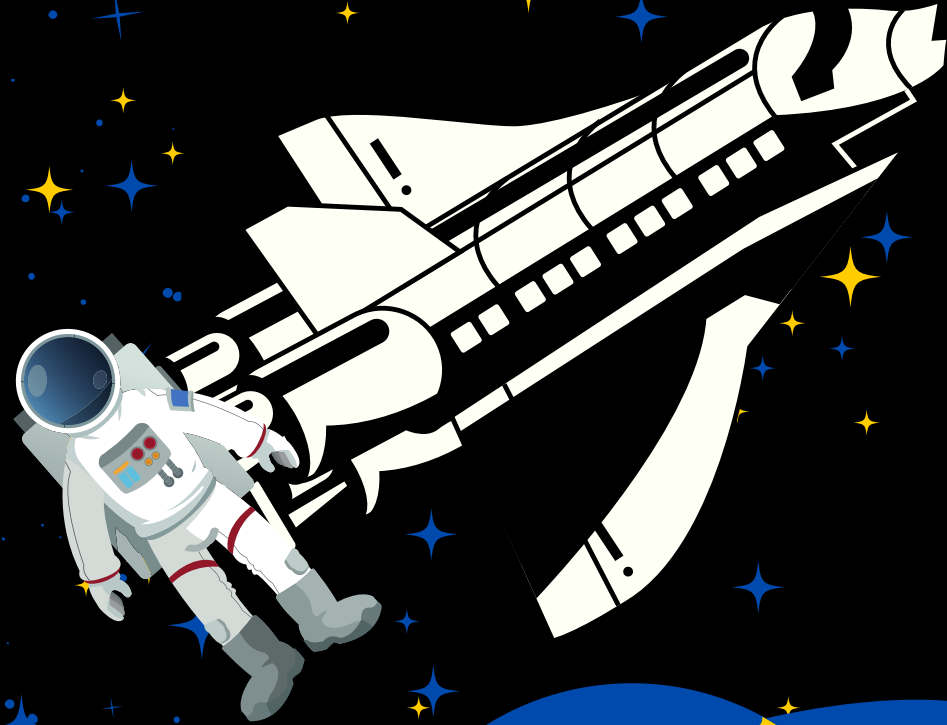

Blast off! As the spaceship zoomed out of the atmosphere, he could see the glorious space in front of him.

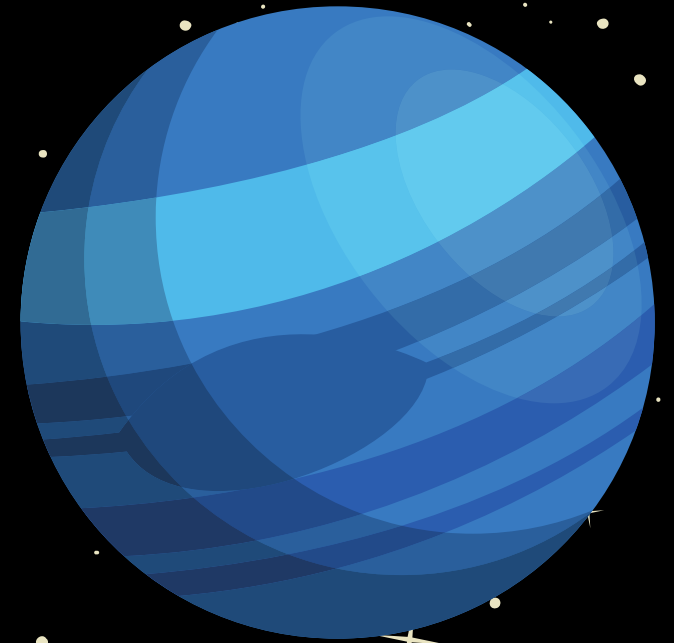

As the astronaut was staring at the beautiful things around him, he saw a scared looking star ahead. So he blasted the thrusters and came for the star.

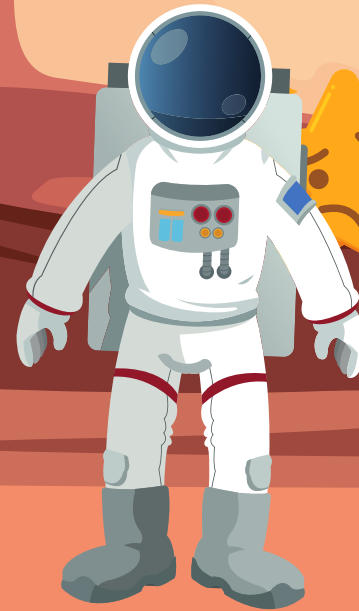

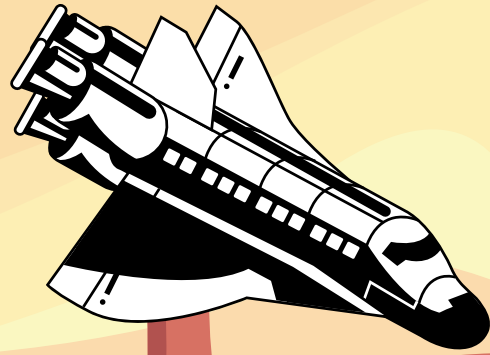

"Come here little one, don't be scared, I'm here to help," said the astronaut as he welcomed him to his spaceship.

Soon the astronaut and the star
stumbled across the planet Mars and
saw livestock ahead.

They landed on Mars and saw something behind an orange rock. They went closer and closer... and closer....

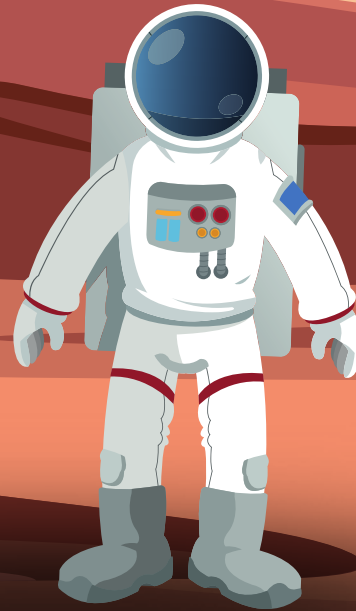

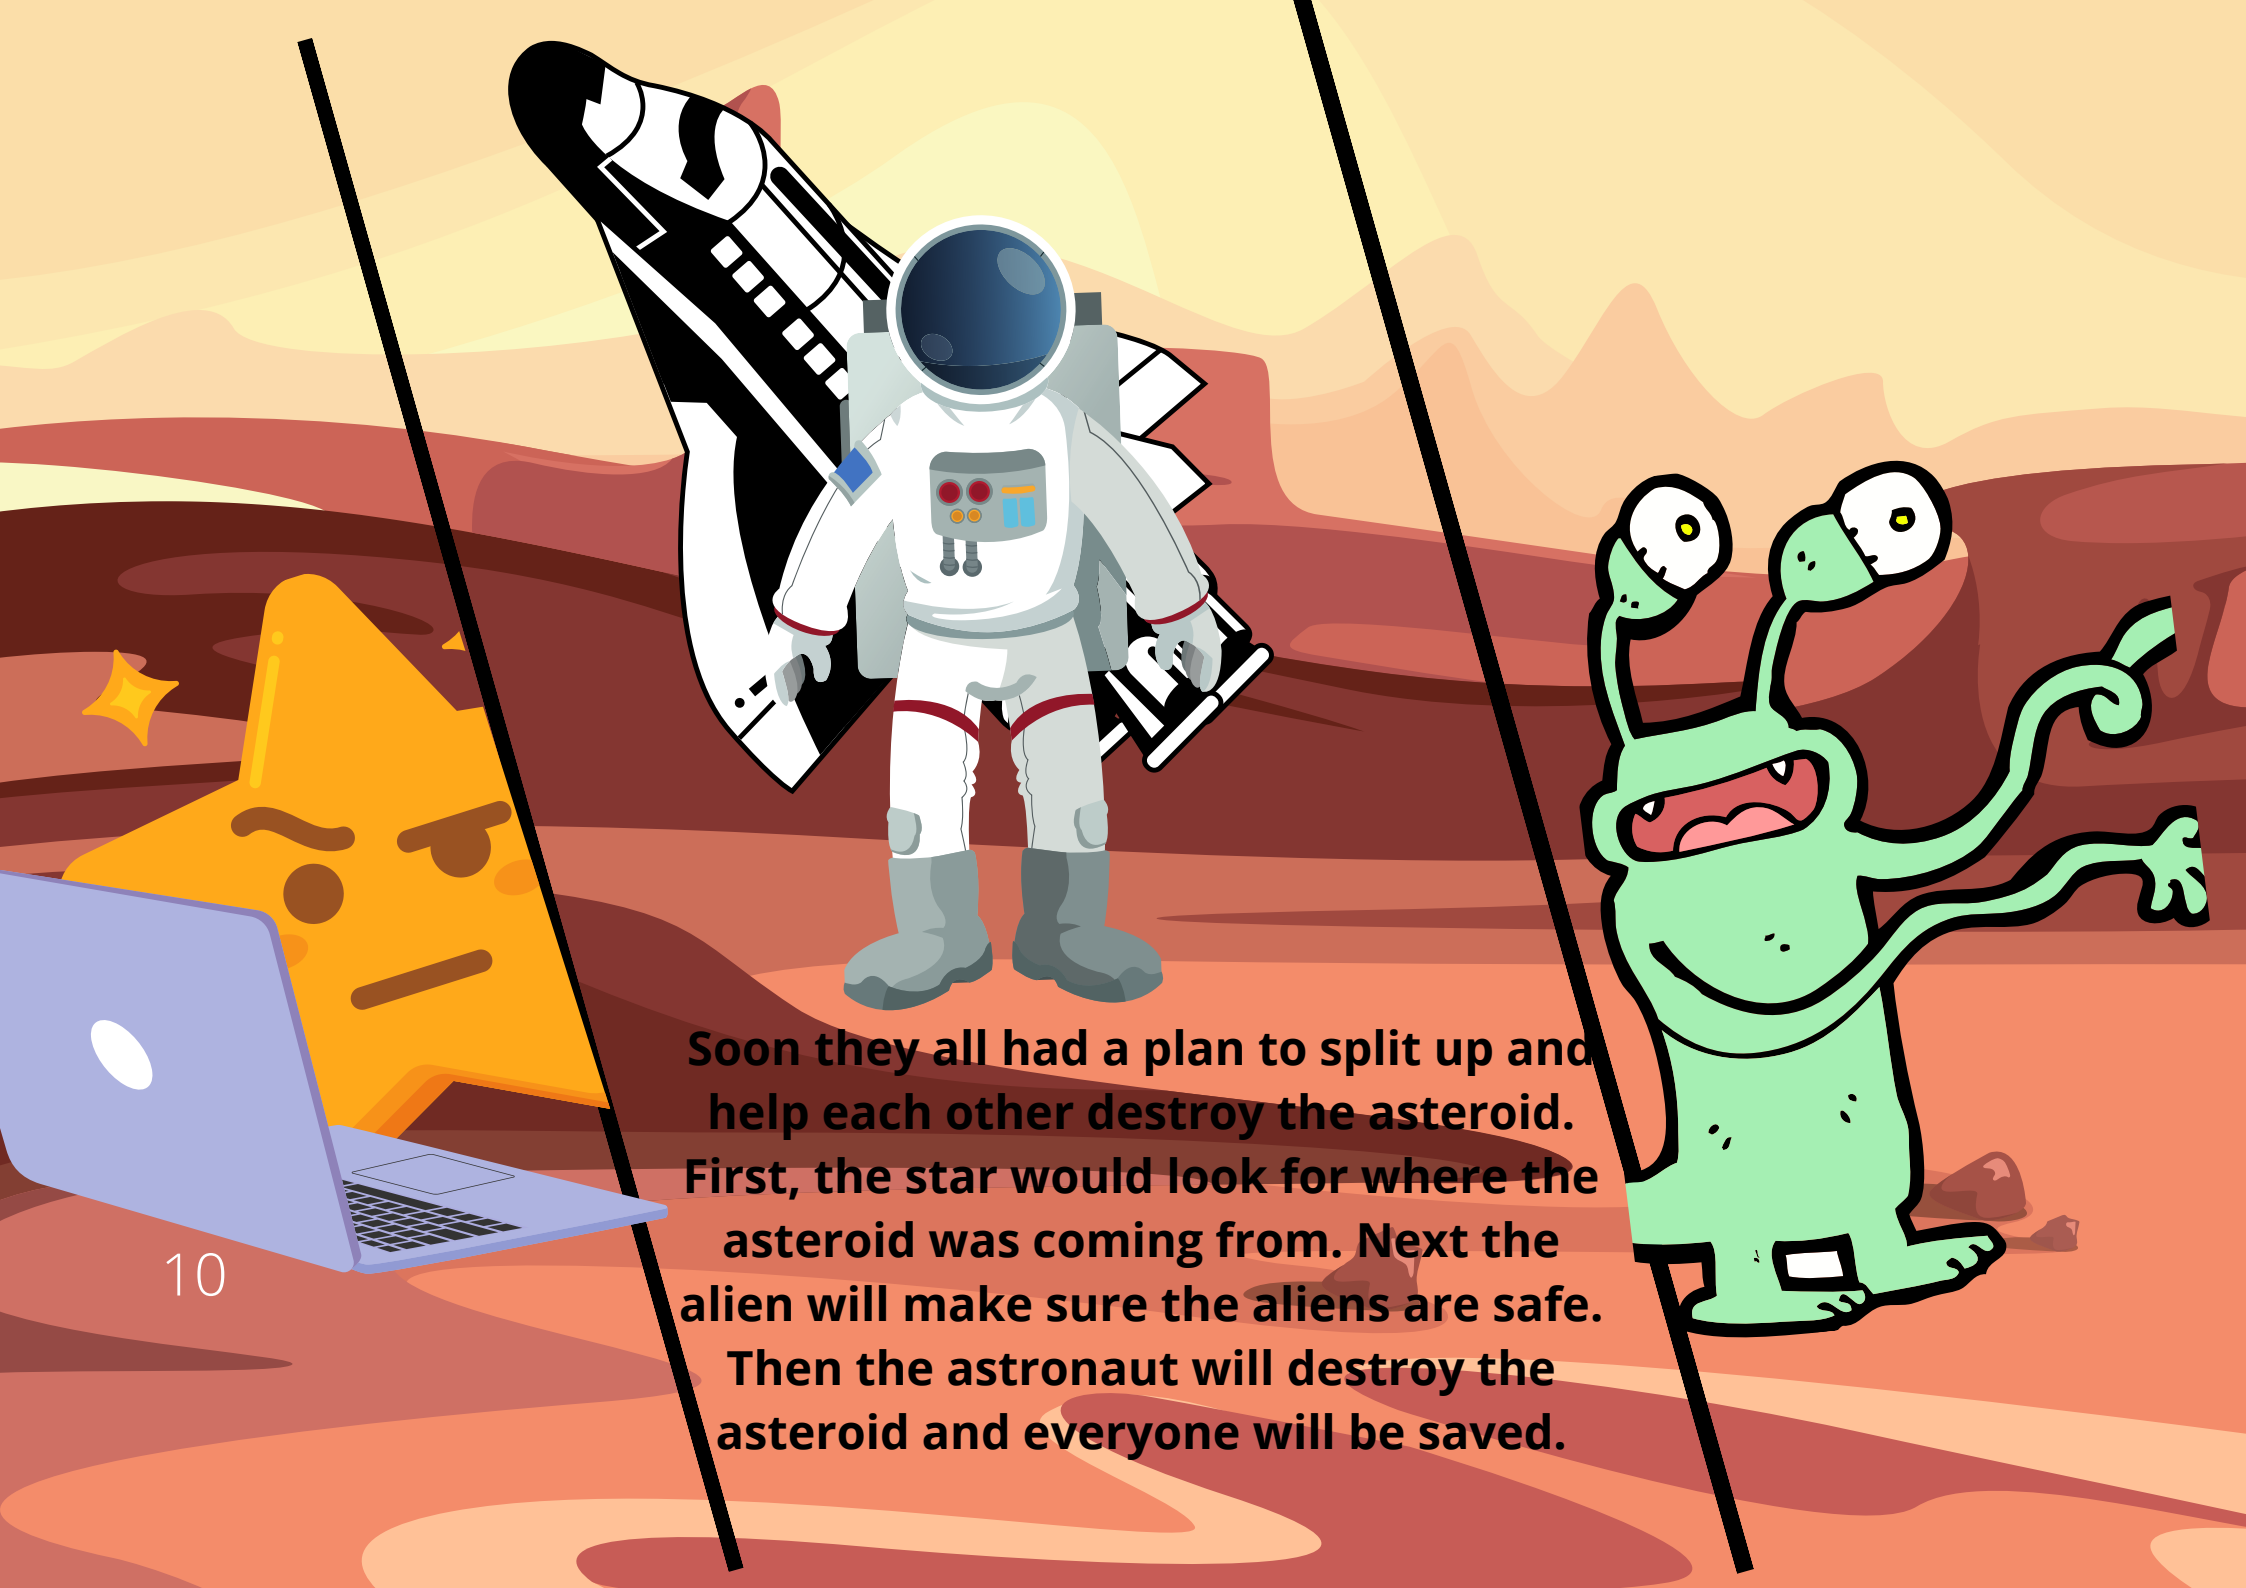

“AAAHHHHH!” they all shouted. It was an alien behind the rock and it started to talk.

“ Please don’t hurt me, I’m innocent,” said the alien in shock. “ I just want to leave this danger zone,” said the alien again.
“ Danger zone, what’s happening?” said the astronaut.
“ Mars will be destroyed by an asteroid and no one will help me,” said the alien with a worried face.
“Don’t worry we will help you,” replied the astronaut.

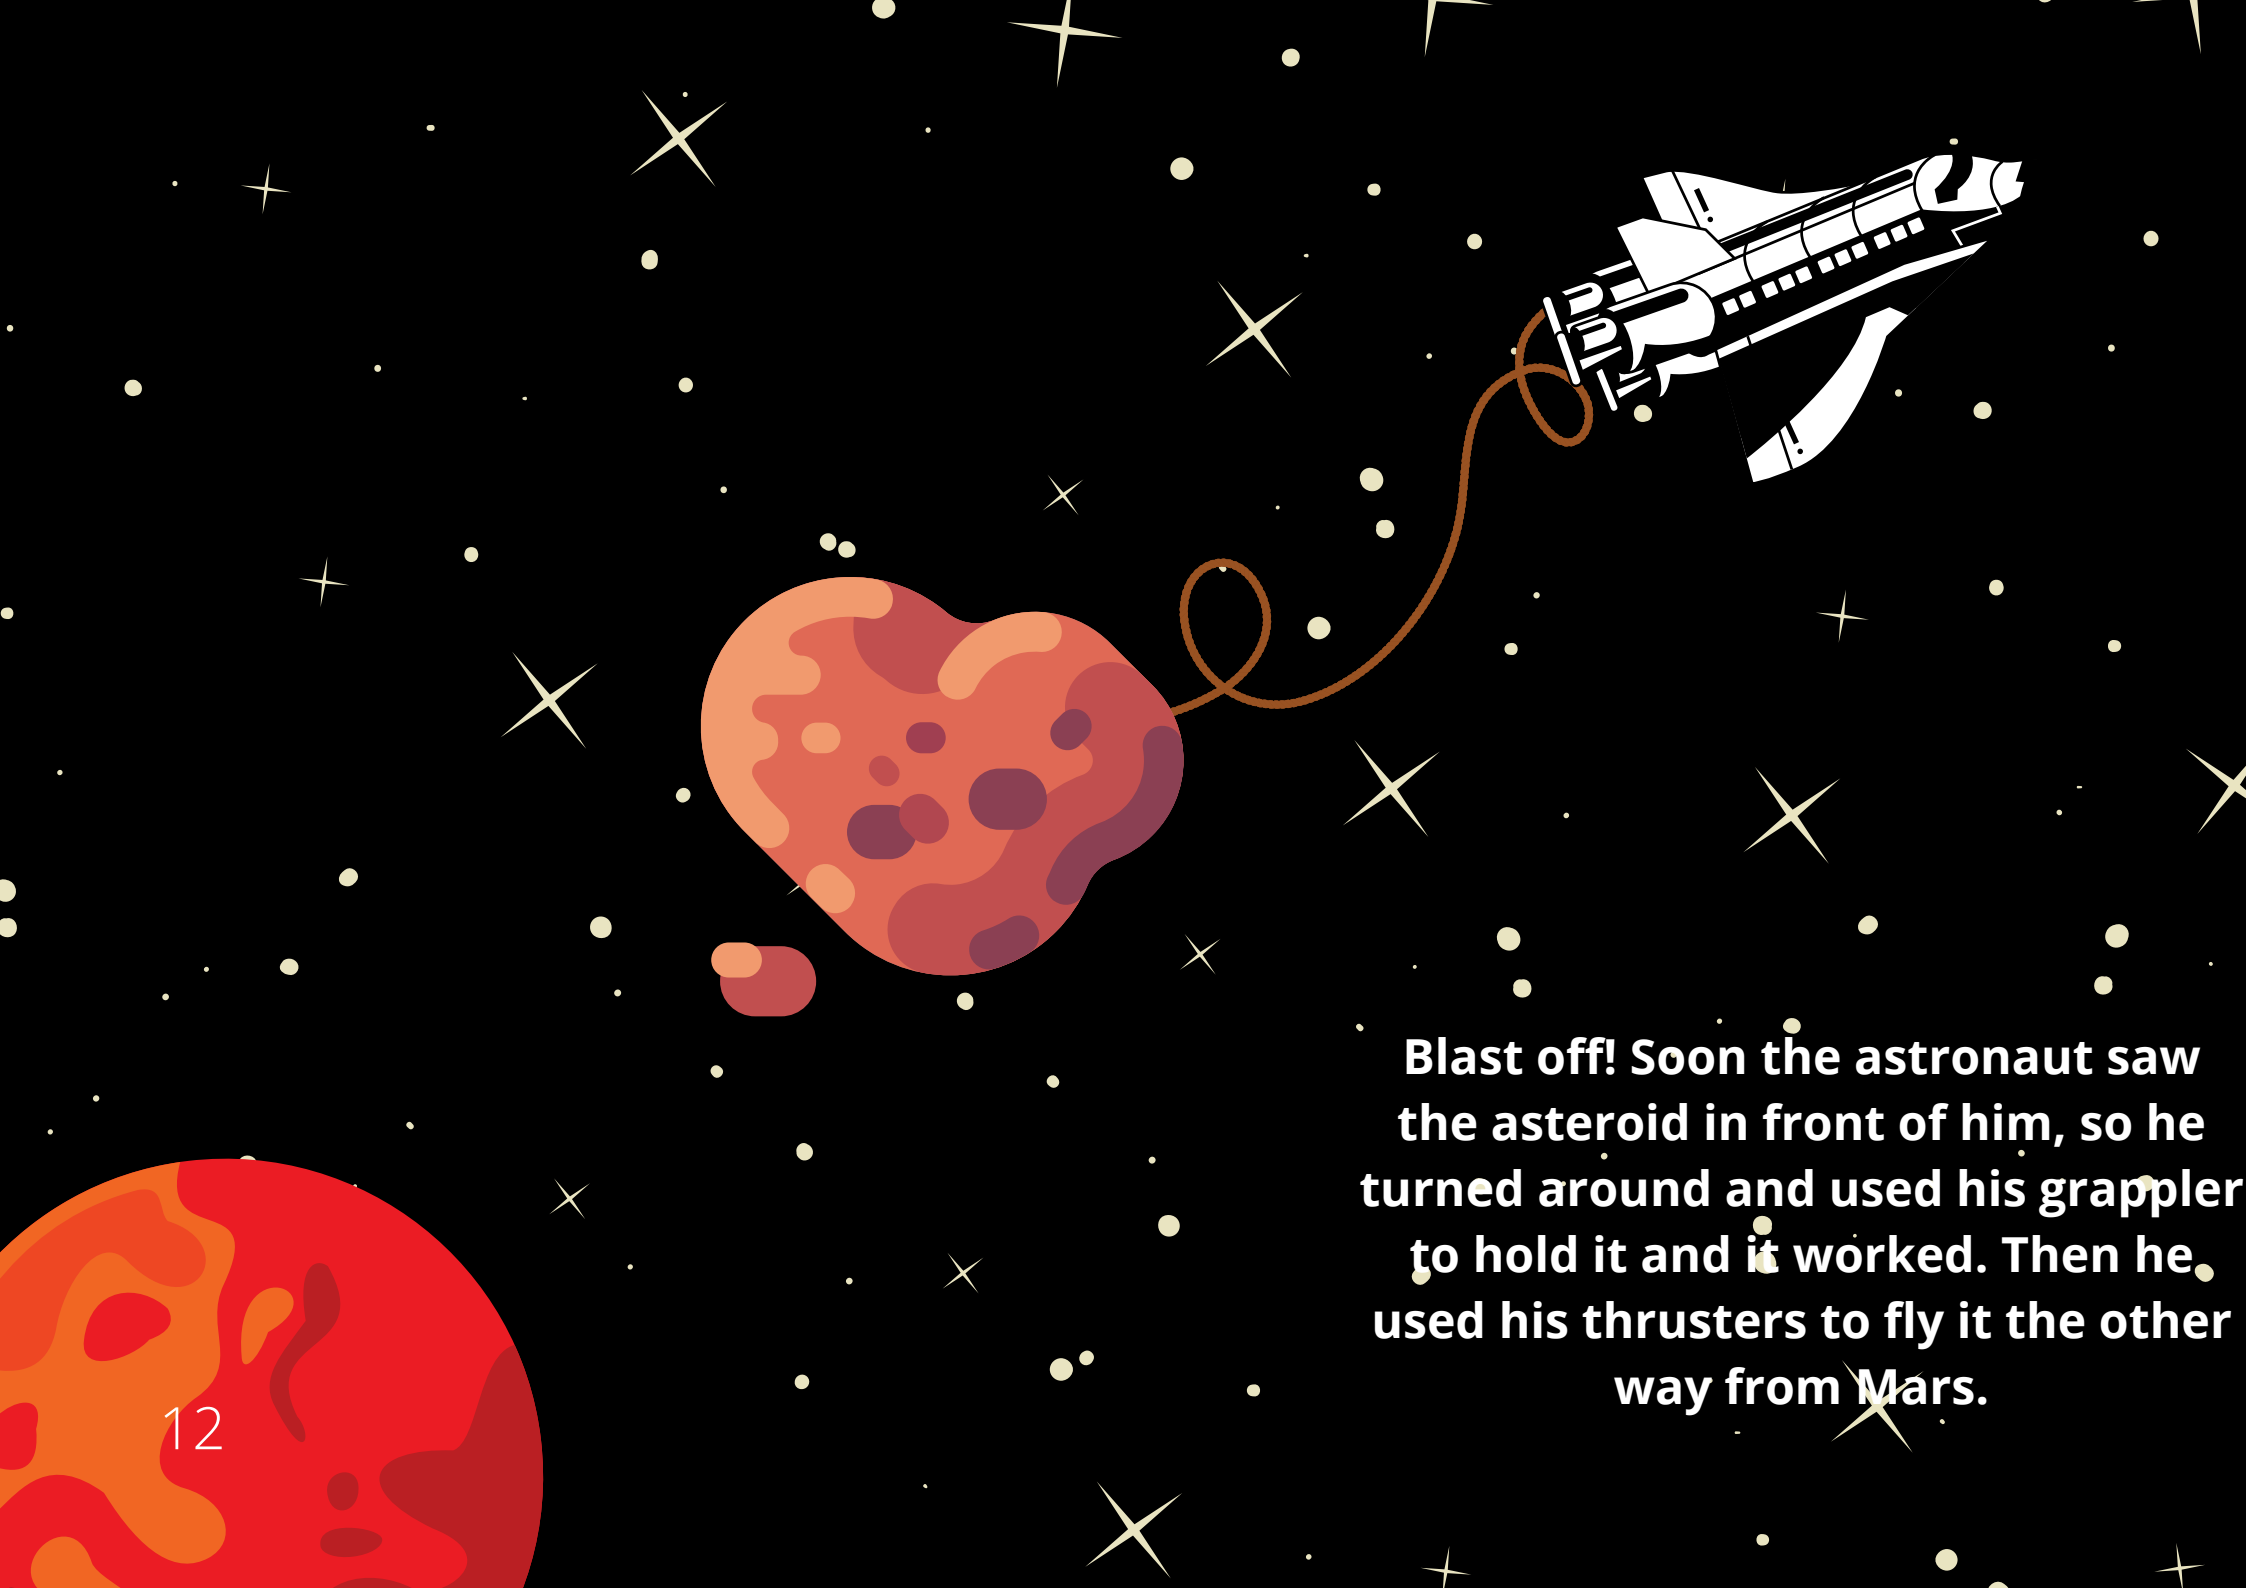

Soon they all had a plan to split up and help each other destroy the asteroid. First, the star would look for where the asteroid was coming from. Next the alien will make sure the aliens are safe. Then the astronaut will destroy the asteroid and everyone will be saved.

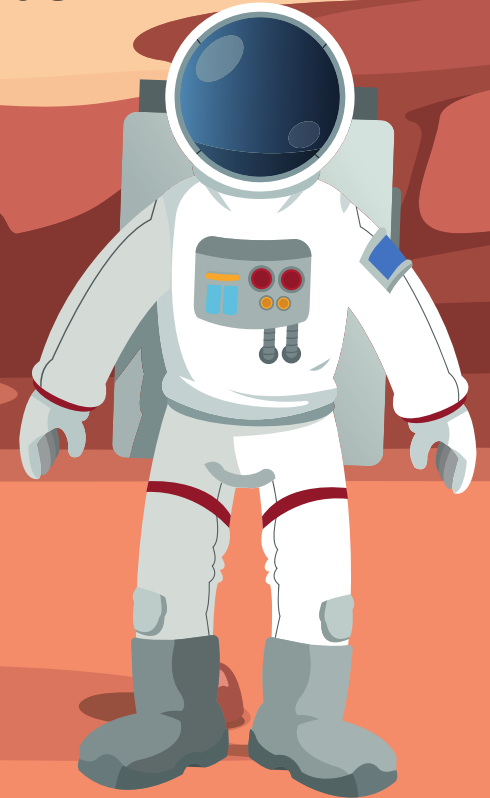

Soon they saw the asteroid really close to Mars. The asteroid was ready, so the star said he was good to go and he gave him a countdown in 3.2.1....

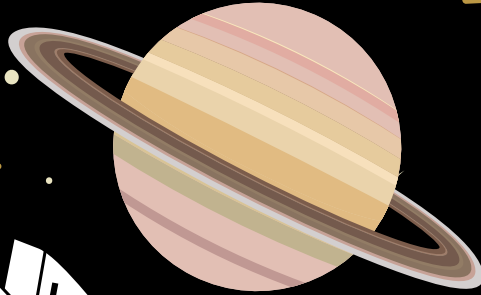

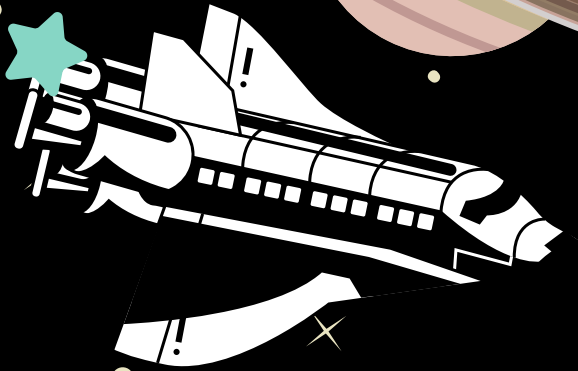

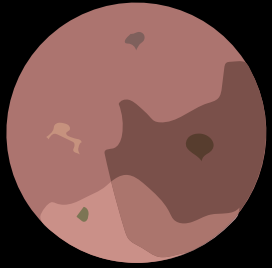

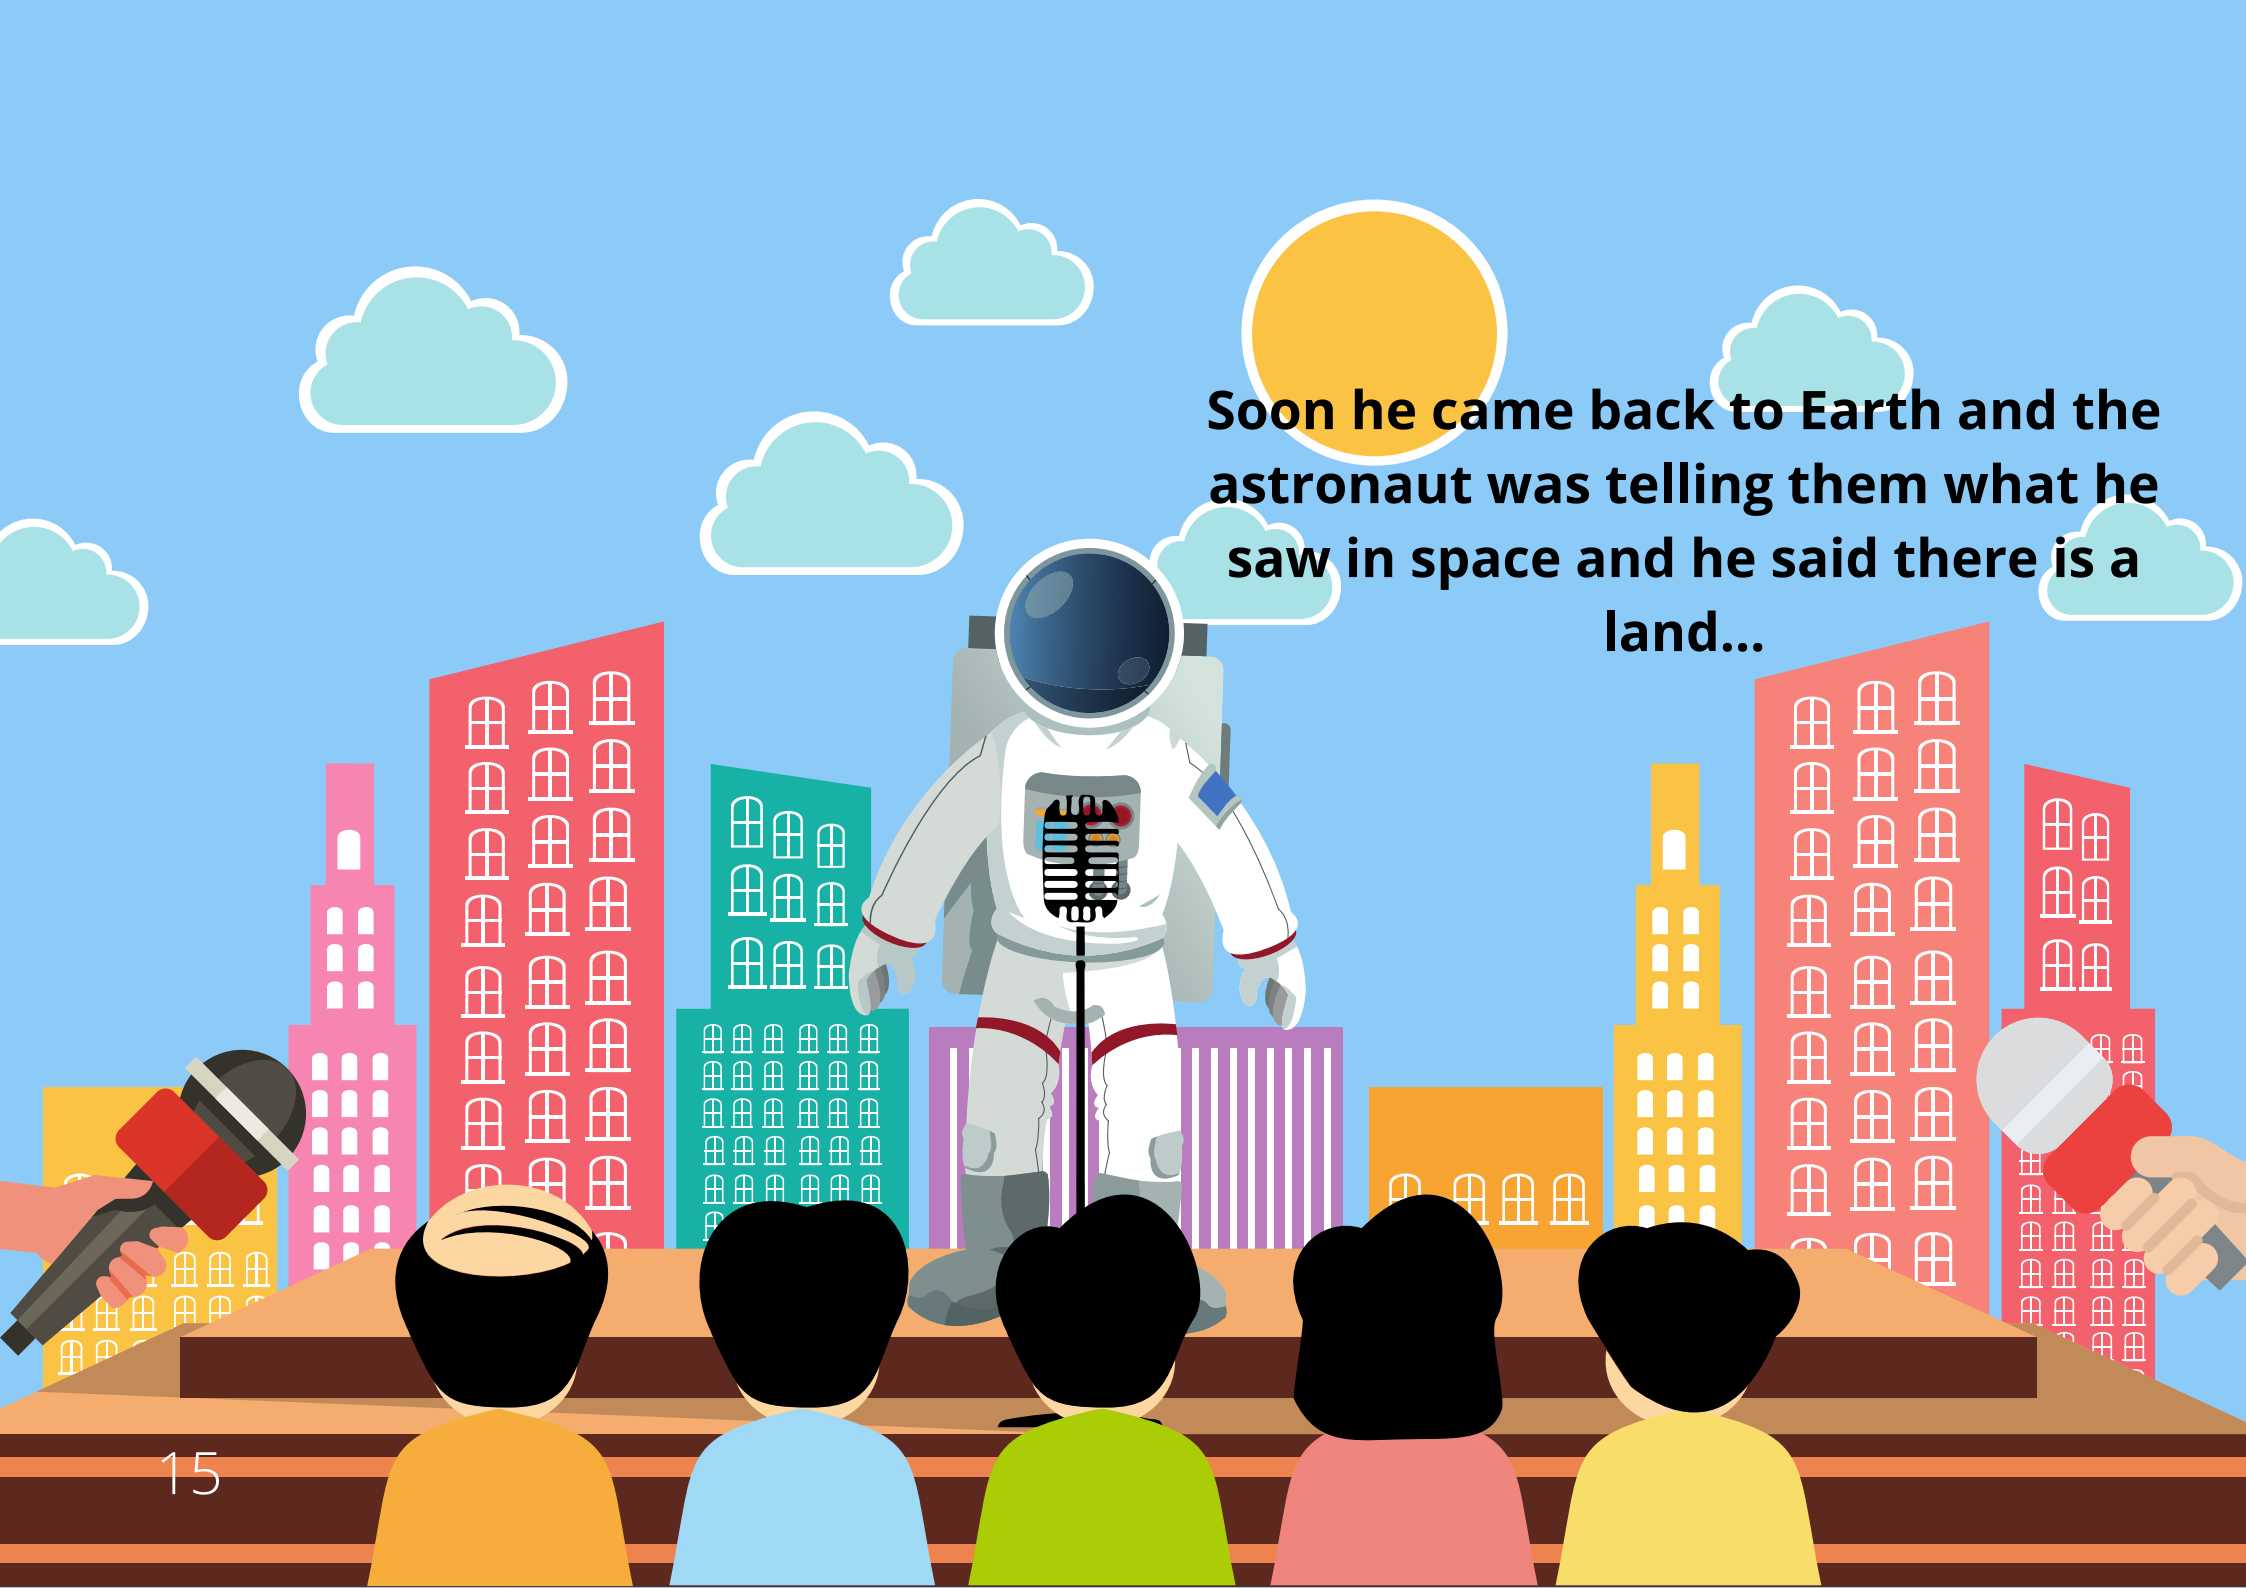

Blast off! Soon the astronaut saw the asteroid in front of him, so he turned around and used his grapple to hold it and it worked. Then he used his thrusters to fly it the other way from Mars.

**“ Hooray for the astronaut, star and the alien,”
chanted the other aliens. Everyone was excited
except for the astronaut. He had a call from Nasa
saying he has to come back to earth or else the
engine would not work and oxygen would not last.**

He said his goodbyes and headed off
in the distance where he could see
Earth once again.

Soon he came back to Earth and the astronaut was telling them what he saw in space and he said there is a land...

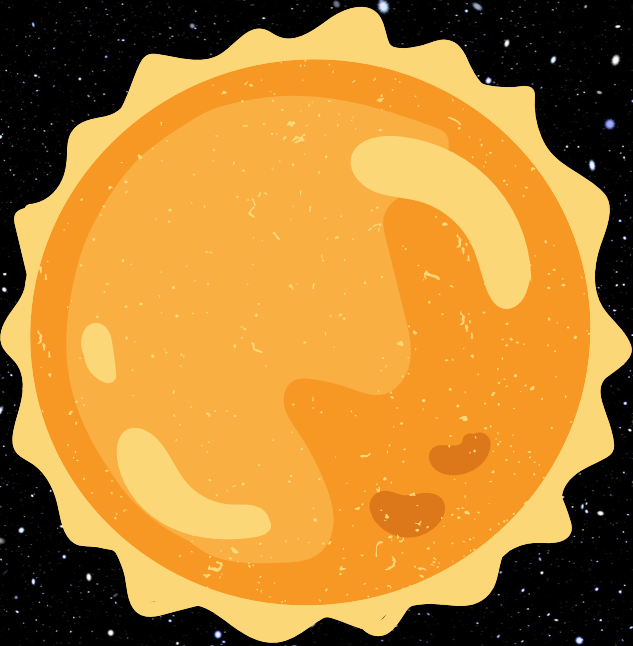

Far beyond the world.

About the author

Hello my name is Lachlan and I'm 11 years old from Australia. Many people don't step up in life and rely on others to do something capable. I also thought about inclusiveness for the book because people in the world don't have any friends or even a family. I do sports and I like to draw crazy things for fun. I play with my friends a lot and I like to play board games. I dream of a world full of people with their families doing fun things together and I wish all wars were over and peace can start again.

" Far beyond the world" shows a brave astronaut who goes to space. When he finds other creatures along the way he will learn to be kind. Bring your popcorn out because he will find mystical creatures to help fight an asteroid. This is a show stopping book that any age can read that will take you on a journey. The message of the story is kindness and inclusiveness to all of the characters including you. So what are you waiting for? Let the journey begin!
