

# HOW DID BEN CHANGE THE WORLD?

**WRITTEN BY-  
ATHARV JOHARI**

*One bright Sunday Ben goes to the park with his family and friends for a picnic.*

*While playing Ben saw people littering, breaking the grass and throwing their plastic waste in the pond or bin's instead of recycling them in the recycling bin right beside them.*

*While going to home he  
saw many cars leaving  
out thick layers on  
smoke.*

*Next morning Ben got dressed up and  
left for school*

*In his social science period his teacher thought his class about the effects of global warming, pollution and climate change.*

*Ben felt very sad about what is happening on his mother earth he wanted to try to stop or reduce this, he thought and thought and thought until he found a solution.*

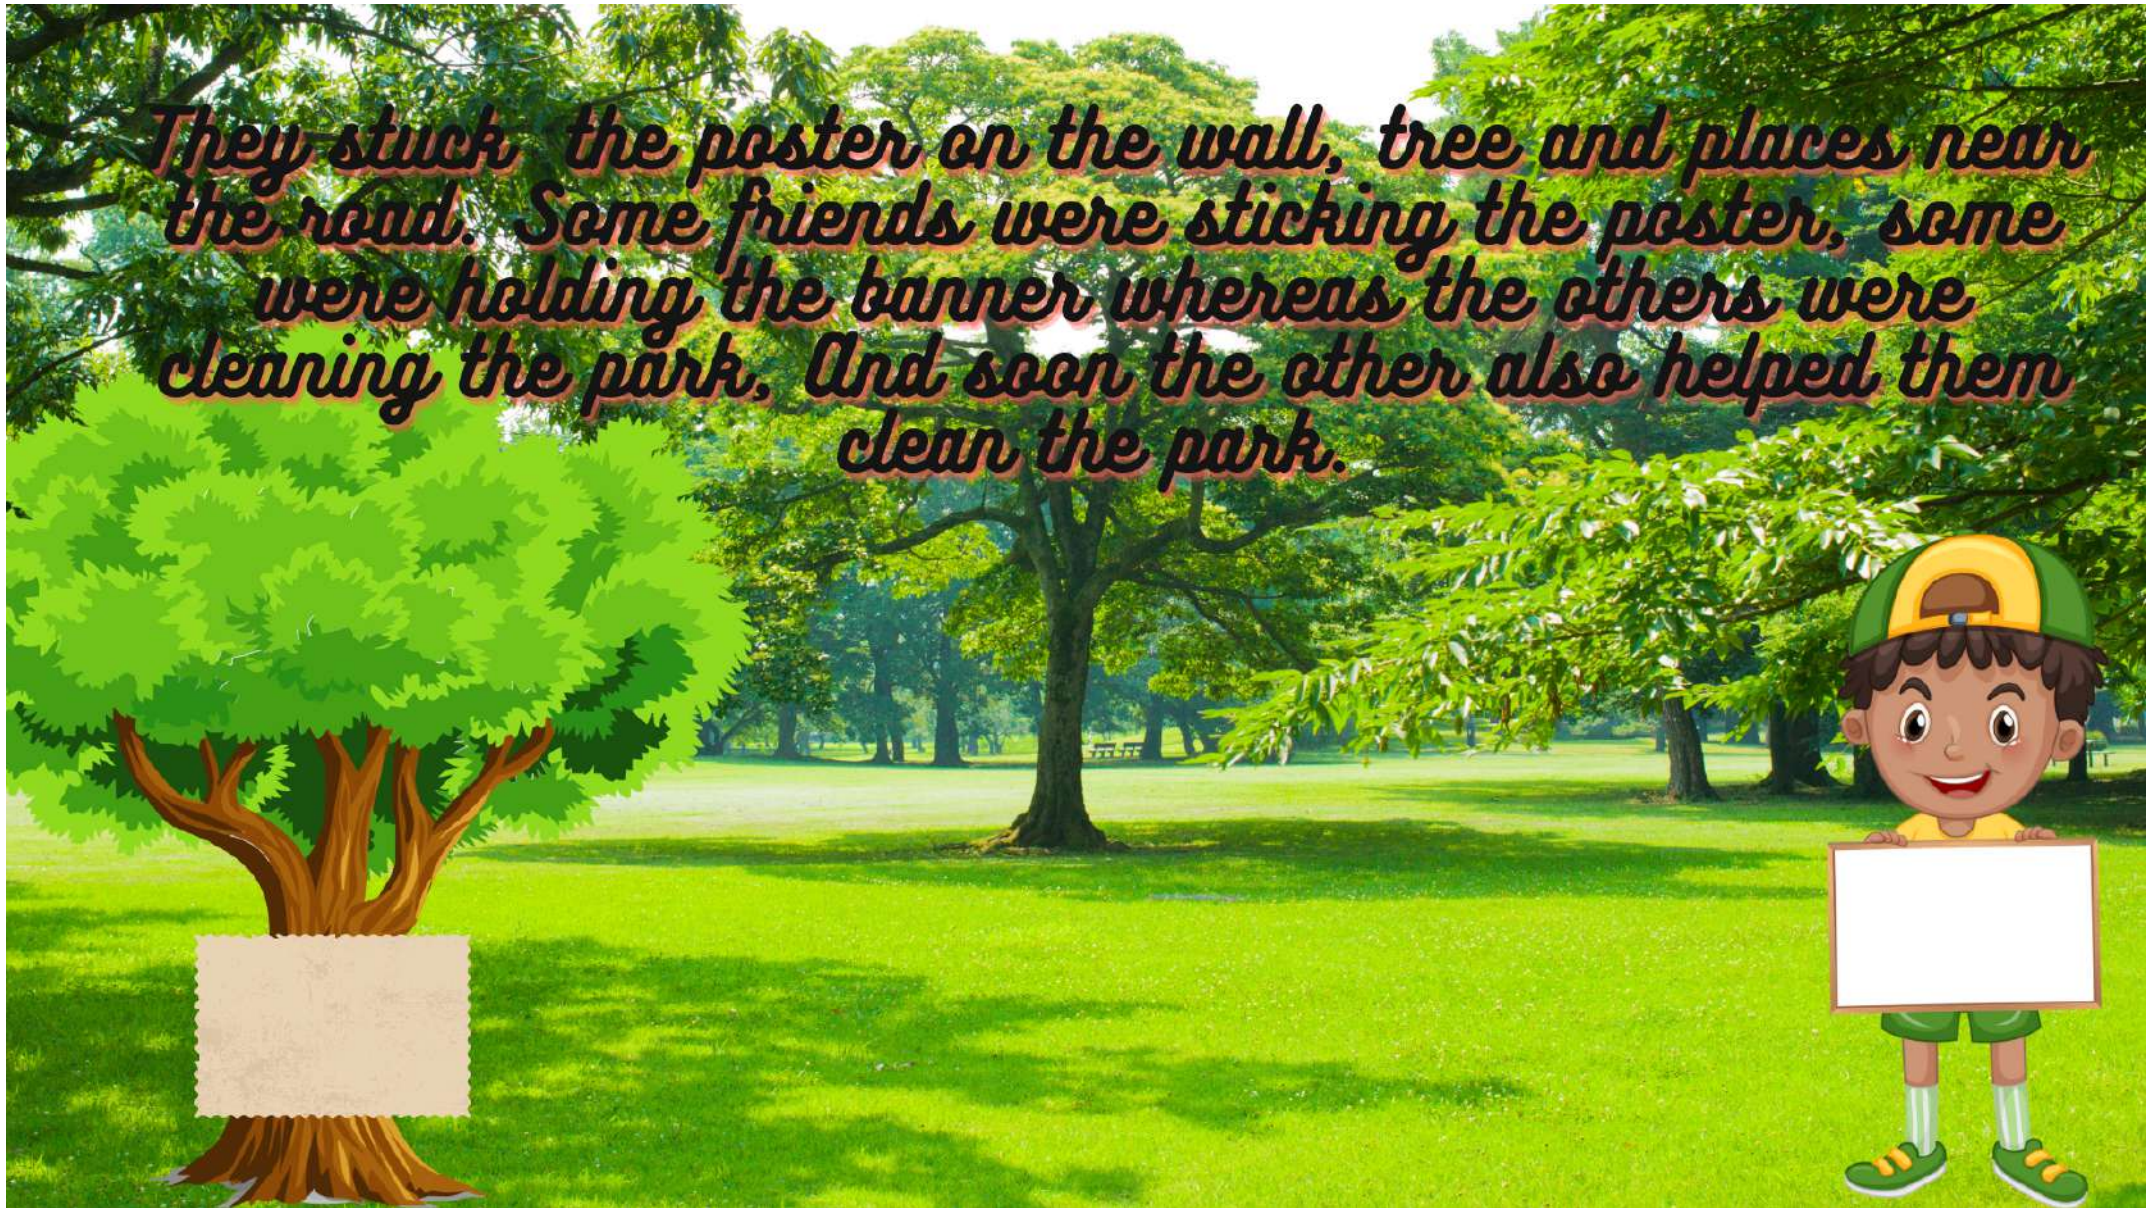

*Ben called up his friends up and explained them his plan.*

The next Sunday Ben and his friends made poster and boards written "Save mother earth don't litter garbage put them in the bin otherwise one you will live in a bin, don't pollute our earth else where will you live? As there is no other earth, if you pollute the air by the smoke of your car what will you breathe? I can't here you there, be some louder there, so please my friends don't litter otherwise where will you live as this the only mother earth."

*They stuck the poster on the wall, tree and places near the road. Some friends were sticking the poster, some were holding the banner whereas the others were cleaning the park. And soon the other also helped them clean the park.*

*So please my friends please  
take small initiatives to be the  
change you want to see in the  
world*

**THE END**
