

Spider Man And His Friends.

Written and illustrated by Justin Robe.

This is dedicated to the people who are bullying each other and don't know the magnitude to which this affects other people.

On a stormy day, Spider man is trying to get Phoebe to come to him but she wasn't listening. He said, " they're going to bully you." Phoebe is spider man's friend and now officially lives with him. Phoebe is a dog.

Phoebe listened to Spider man and went back to his house and she was feeling safe once she got there. Phoebe is safe and sound from the dangerous people There was a landslide after heavy rain but nothing was damaged and no one was hurt.

Spider man doesn't want to fight the enemies but they're bullying other people. Darth Vader doesn't want to either so Darth Vader said on the phone to Spider man, "we're not fighting the enemies." While on the phone to Darth Vader, Spider man said, "I know we're not fighting them but we're sending a message to be kind and not bully."

Boom, buildings are falling apart because people are not showing respect to the city. Spider man is going to send a message to the people that are bullying other people and to show some respect when he gets there. Once spider man finished his sentence, someone randomly punched him.

Spider man was really hurt when he got punched, then they started to bully again. Spider man couldn't send the message and then more people started to bully other people. Spider man is looking after Phoebe while he is recovering from the punch that the person did.

Darth Vader came to the bullying people and he said, "stop arguing and be kind". Everyone listened to him and started being kind to one another.

Someone tried to hurt Darth Vader but he jumped over the person.

He walked away and was being kind to lots of people by saying hello.

2 years later,

There was an earthquake that shocked everyone in the city and it was a magnitude greater than seven point zero (magnitude is how strong the earthquake is). The earthquake injured fifteen people and the tsunami injured eight hundred people.

Buildings were crashing down, people getting injured, buildings falling on other buildings, glass breaking, people trapped in buildings and space wasted.

11

There were no hospitals in the city because they were all smashed down. People from the hospital fell off their hospital bed but didn't hurt themselves much more.

It was night time at 6 pm and people were left crying that their whole family were injured and it's only them in their family for a while.

Some people said, "I'm going somewhere where there is the least earthquakes while some people are having dinner."

Most people were friends again and said "what happened to your family?" They said, "they were injured by the tsunami and I can't see them in a while."

CAUTION

They wished there wasn't a beach near us so there wasn't any tsunamis. People were stuck in the sand and couldn't get out so people helped them out.

Phoebe, Spider man and DARTH Vader were looking out for each other and that's how they didn't get injured.

About the author,

My name is Justin and I am from Victoria.

**There are irresponsible people in the world and I
thought of a book that people can change from
irresponsible to responsible in life.**

**In my spare time, I try to think about books that can
change the world.**

**I searched up on google what is the strongest
earthquake in the world and it was in Alaska with a
magnitude of nine point five. That's how I thought
about this book because people are shocked about
magnitudes over seven.**

Spider man, DARTH Vader and Phoebe are just friends but what will they do to make the people stop bullying each other and don't damage money.
