

The Lost Soldier

By Charlie

"Captain, I have a new mission for you," said the commander. "Find the missing soldier."

"Yes sir!"

"He is on one of the eight planets. You will start off at Mercury and then Venus but don't go to Earth. Mars, Jupiter, Saturn, Uranus and Neptune. You got that?!"

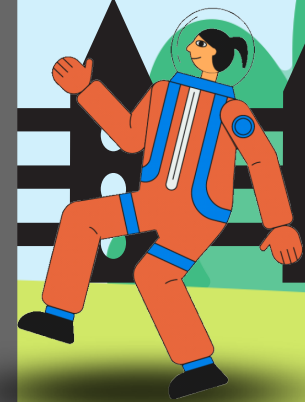

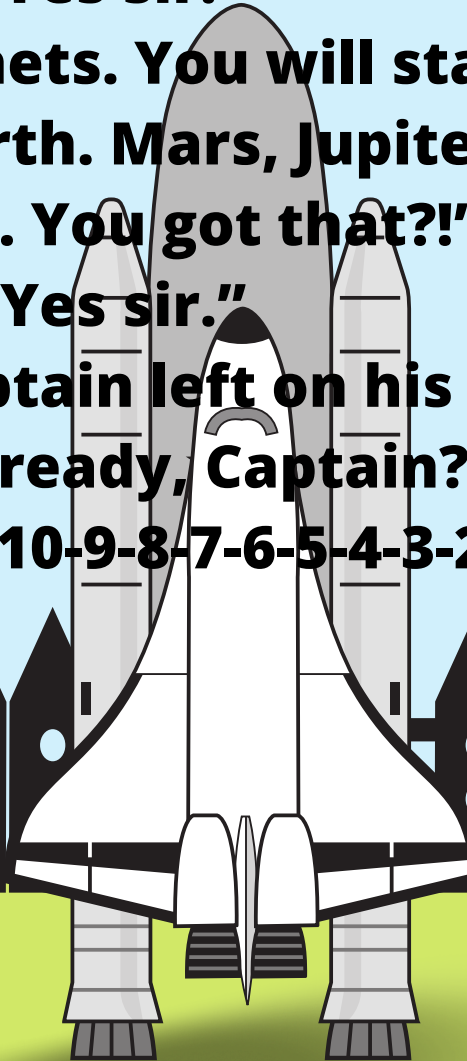

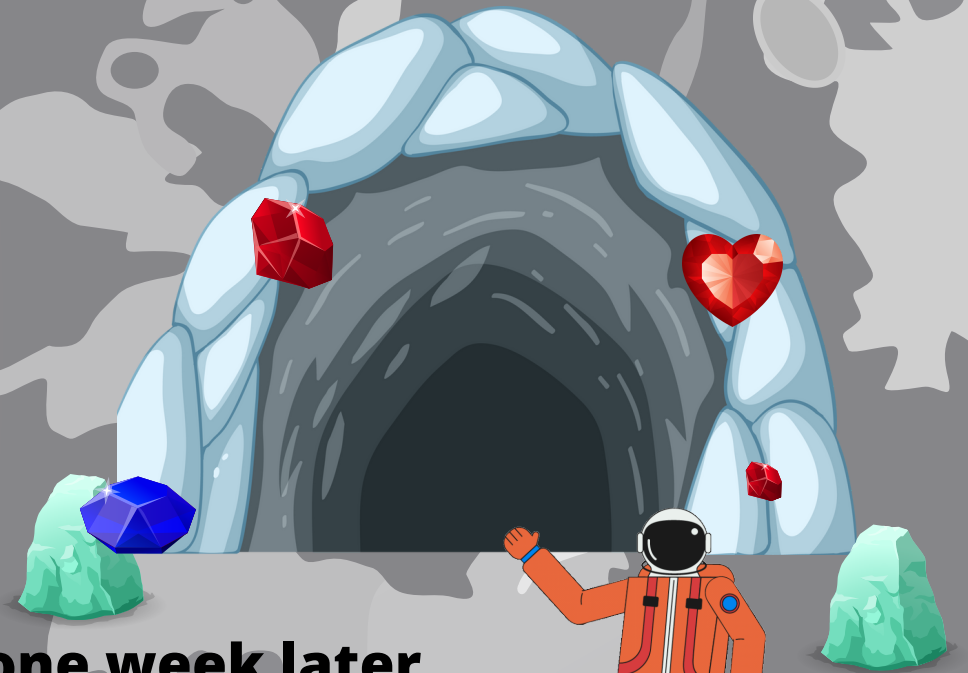

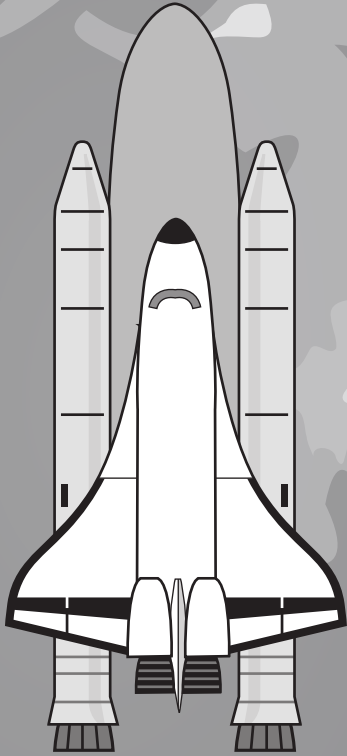

"Yes sir."

The next day Captain left on his mission.

"Are you ready, Captain?"

"I was born ready. In 10-9-8-7-6-5-4-3-2-1,blast off!"

It wa one week later.

"Now arriving at Mercury. It is extremely sweltering here."

"Tell me your surroundings." said Mission Control.

"Well, it is rocky and there is a strange, dark cave in the distance."

" Can you go in the cave now?"

"Ok, I am in the cave. It is dark."

"Then turn the flashlight on."

"Ok."

"What is that?" asked Captain.

"It is a strange rock. It kind of looks like a head."

"What do you mean?" responded Mission Control.

"It is moving."

"Get out of there now!"

"It is following me."

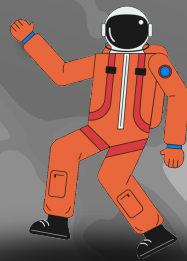

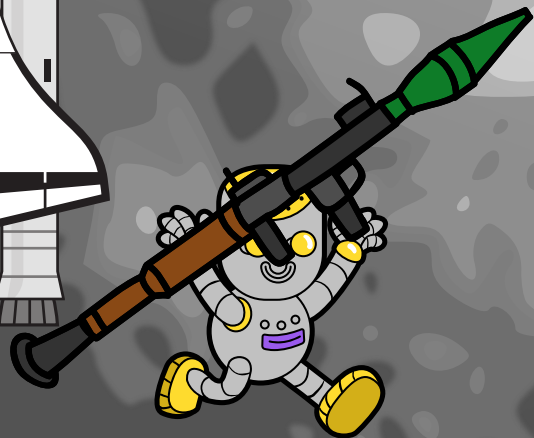

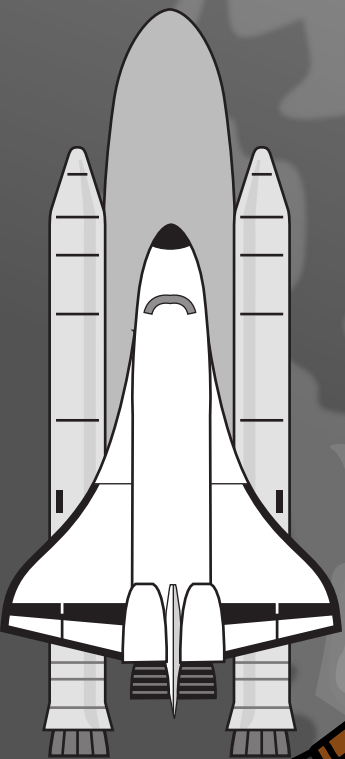

"Load your blaster and shoot it!"

"It is too strong!"

Crash!

"What was that?" asked Mission Control.

"It was a massive boulder about the size of a wooden shack."

"We will send you a rocket launcher in the teleporter on the ship."

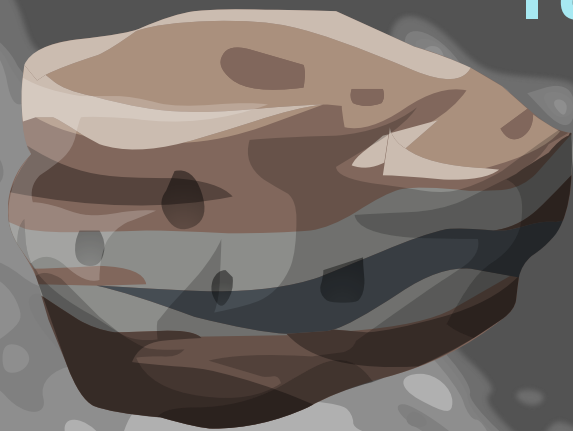

"I cannot get in the ship at the moment."

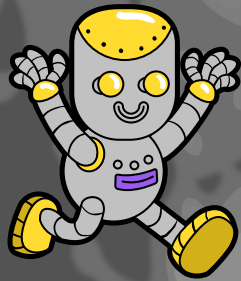

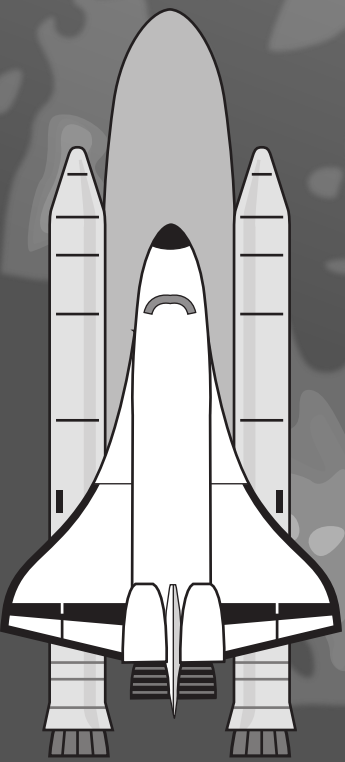

"We will send out Gizmo."

"Who's Gizmo?"

"A droid on this ship."

"Well, send him out."

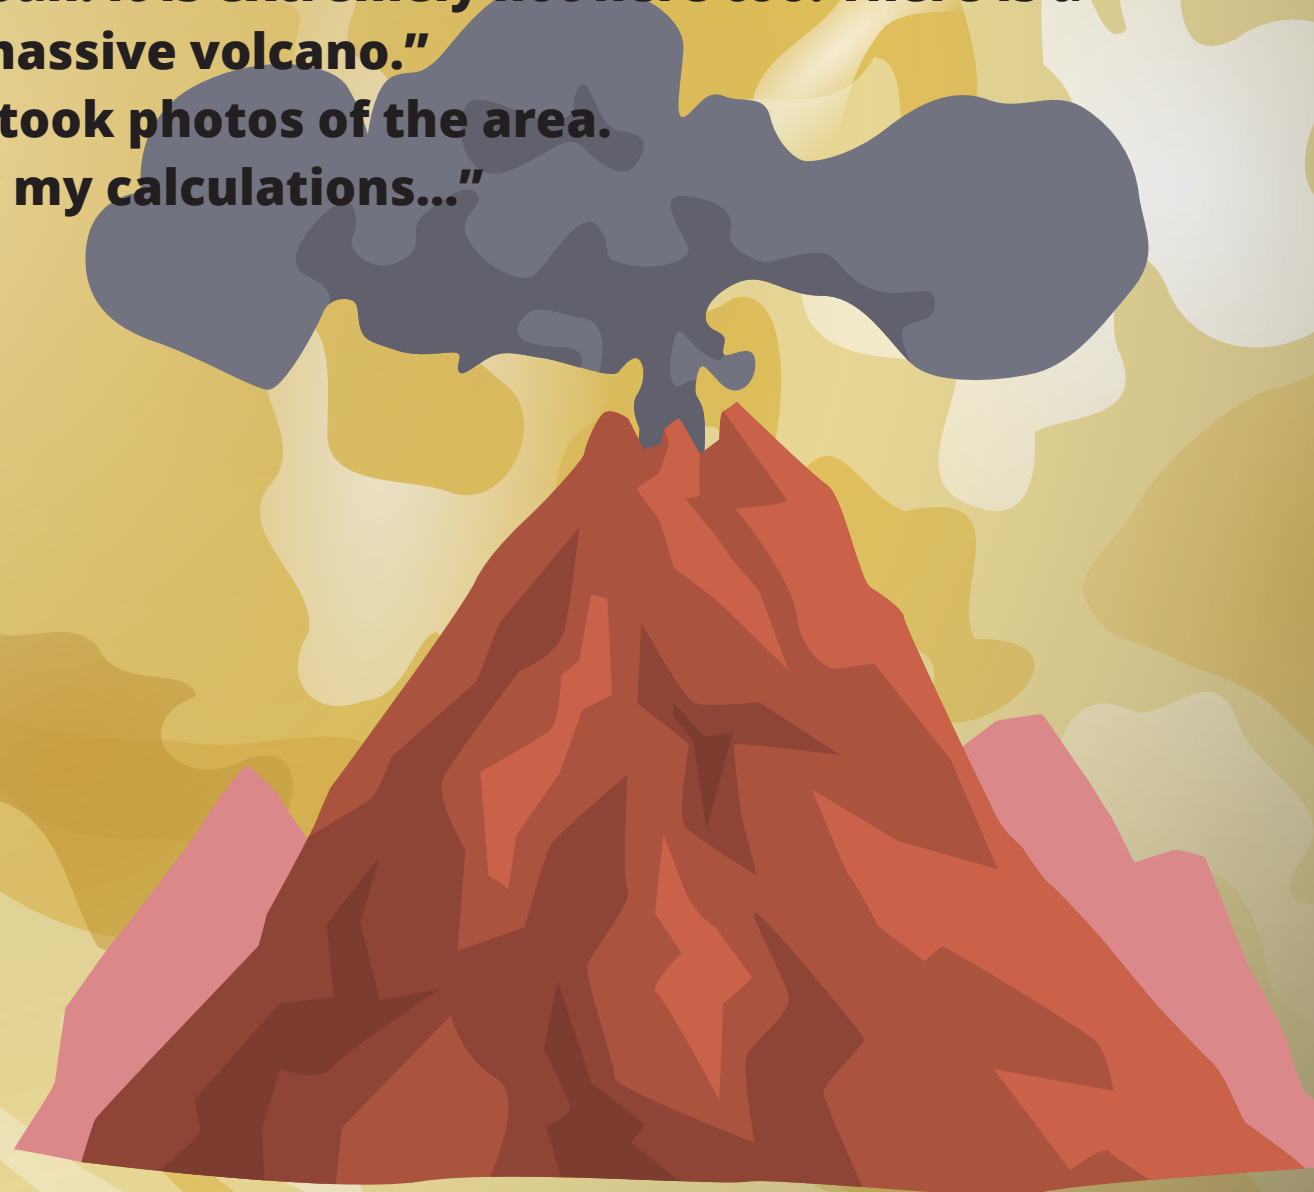

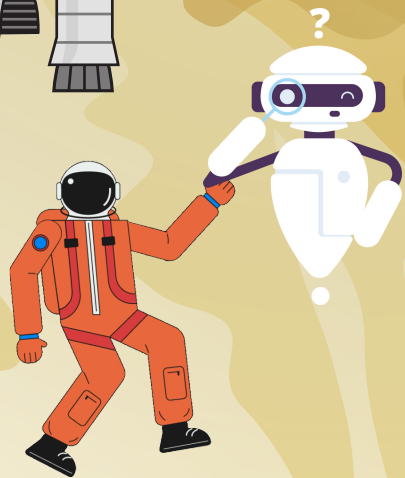

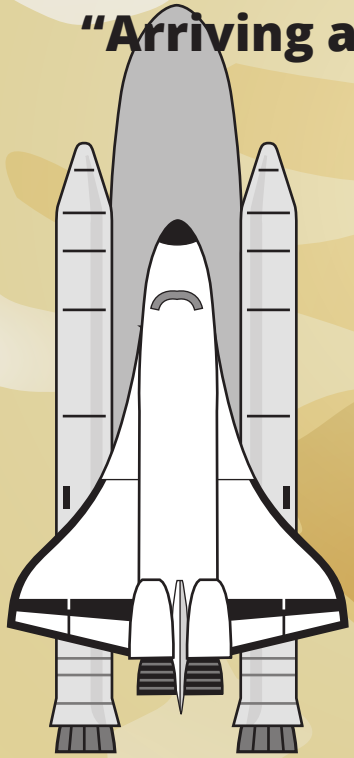

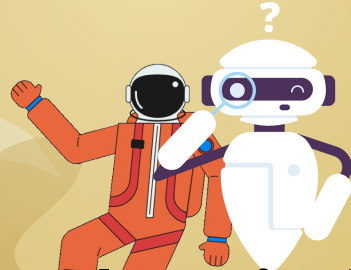

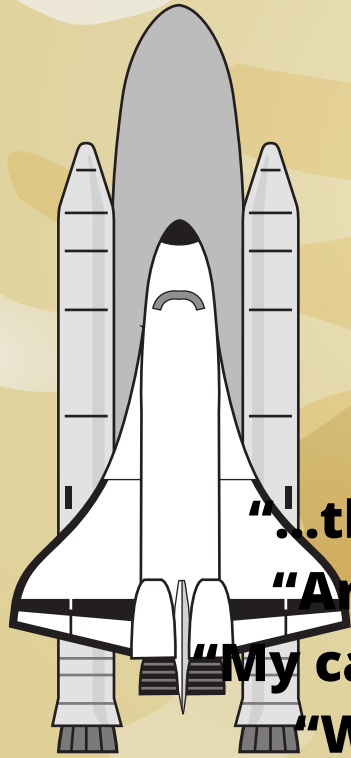

“Ok, I see Gizmo in the distance. I have the rocket.” BANG! “I destroyed the weird creature . The soldier is not here. I am leaving Mercury.”

"Arriving at Venus now. Woah. It is extremely hot here too. There is a massive volcano."

Gizzmo, took photos of the area.

"By my calculations..."

"...the volcano is about to erupt."

"Are you sure?" asked Captain.

"My calculations are always correct."

"Well, better get out of here."

"It has erupted."

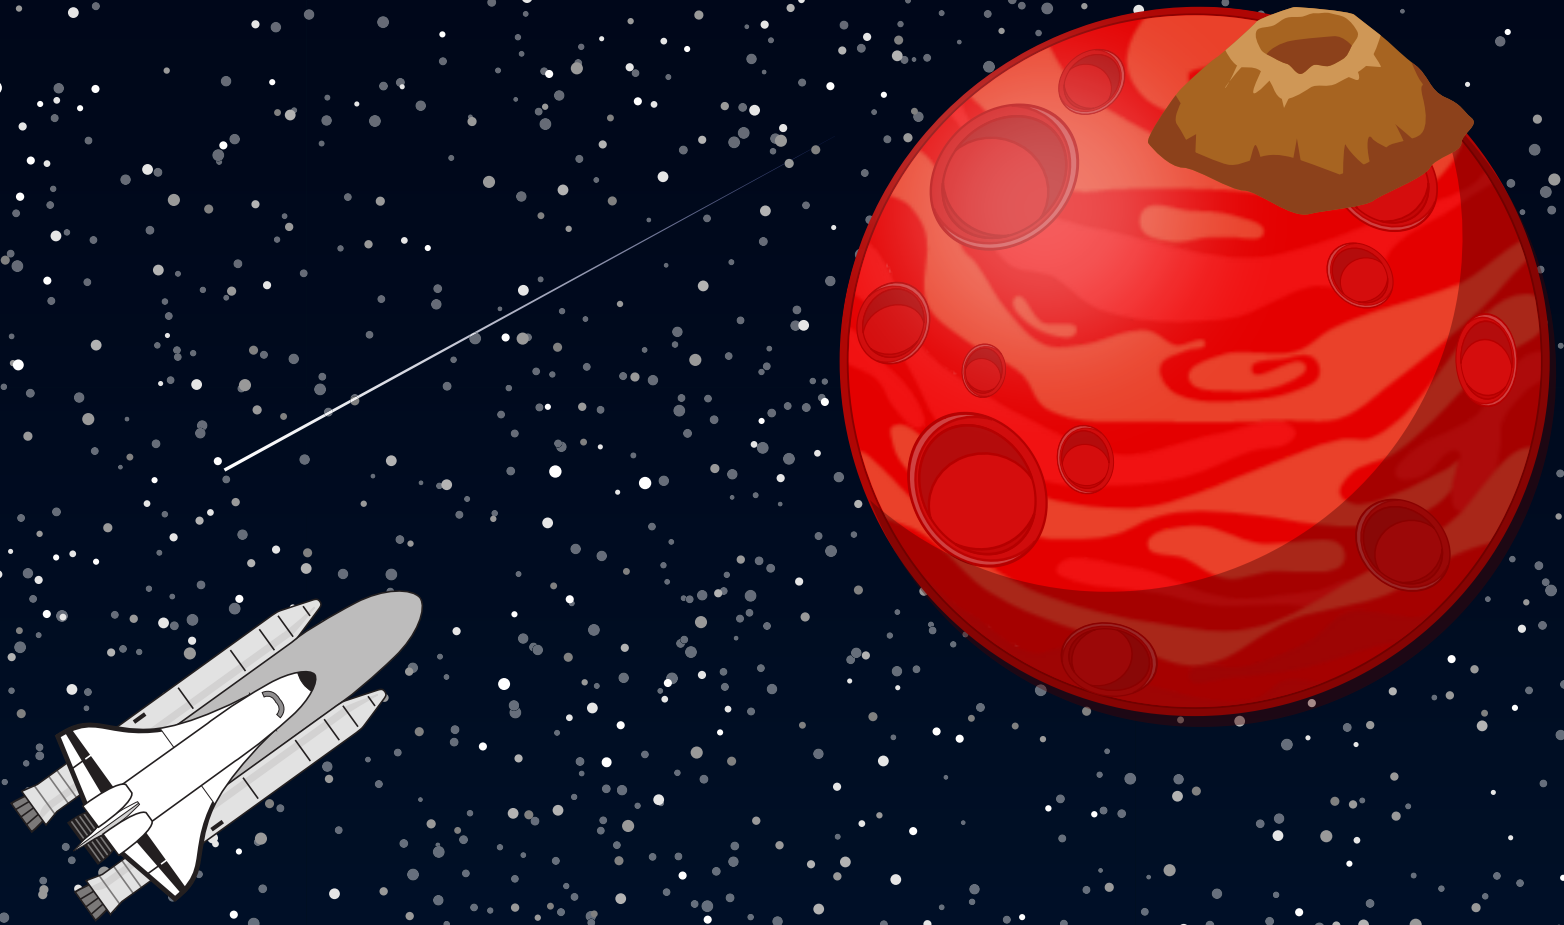

"Quick, go to the ship."

Crash!

"Quick, run, turn it on!"

"That was a close one."

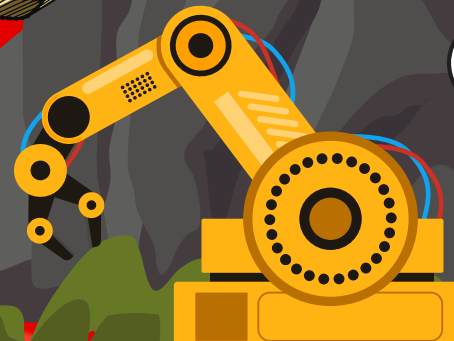

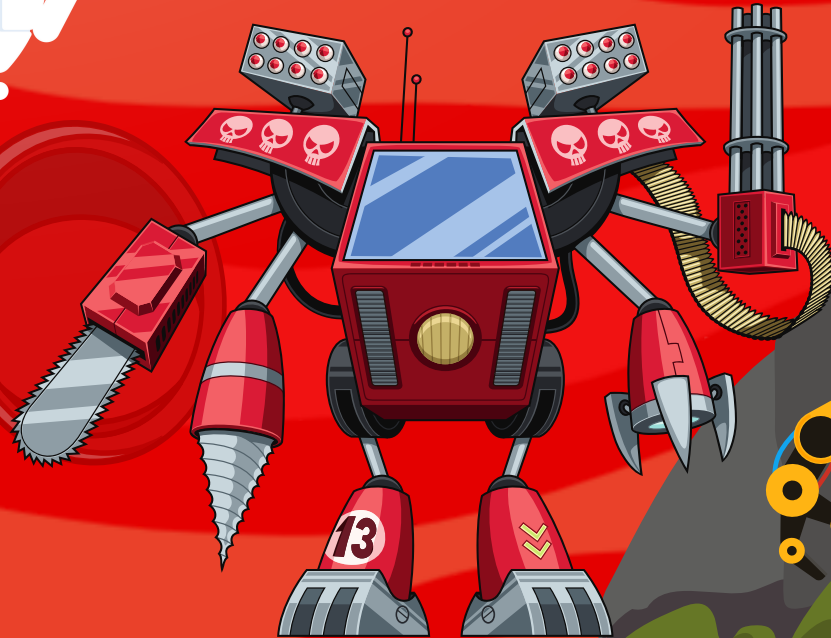

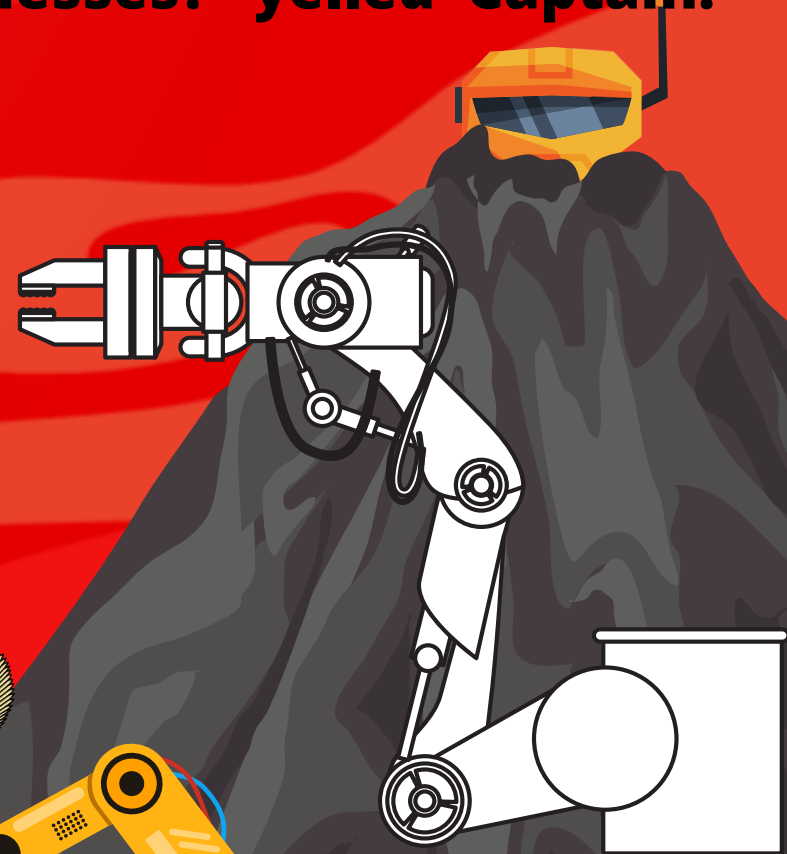

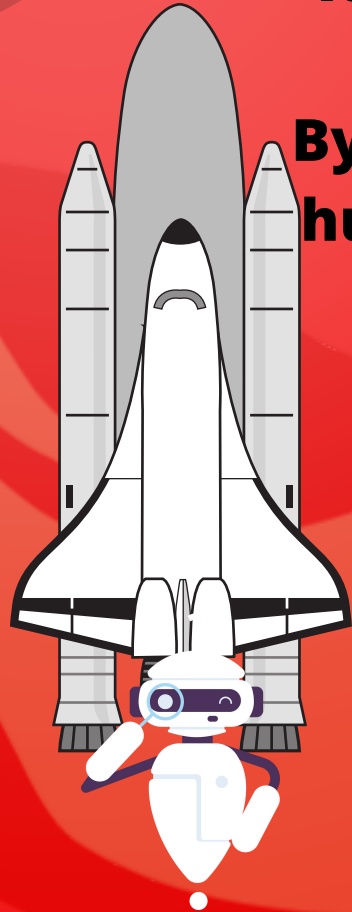

After they left Venus they went to Mars. In the distance they could see a volcano.

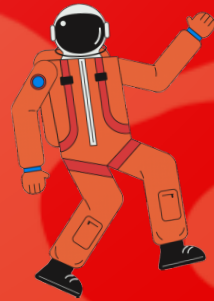

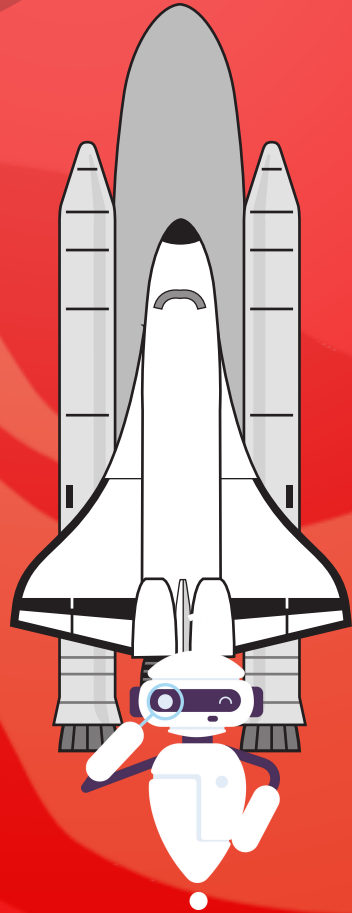

"It looks like a giant robot coming out of the volcano."

"So that explains the robot hands."

By my calculations, its strength is 180. Danger level to humankind: 10. Chance of beating it: 2%." Gizmo said to Captain.

"What? Any weaknesses?" yelled Captain.

"Yes, actually one."

"What is it?"

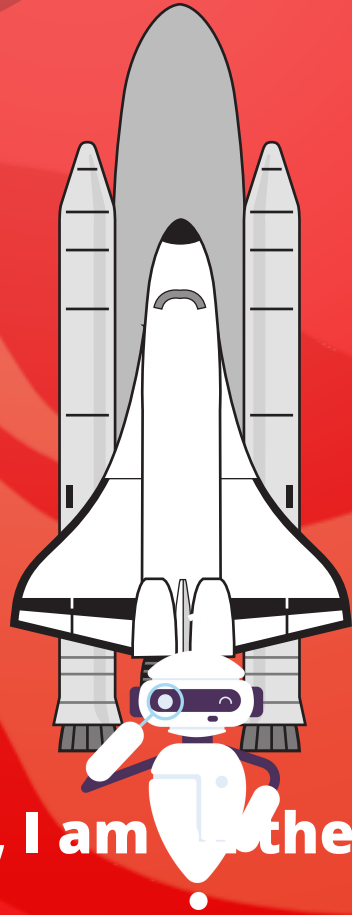

"It is one of the antennas on its head. The antenna controls the robot but it is hard to get to."

"I don't care."

"Fine, I think I have a grappling glove."

Captain went to get the grappling hook so he could climb up the giant robot.

"Ok, I am the robot's head." Captain said in a calm voice.

"Grabbing the antenna. I got the wrong one. Ok, I got the right antenna. Defeated the giant robot. Im coming back to the ship."

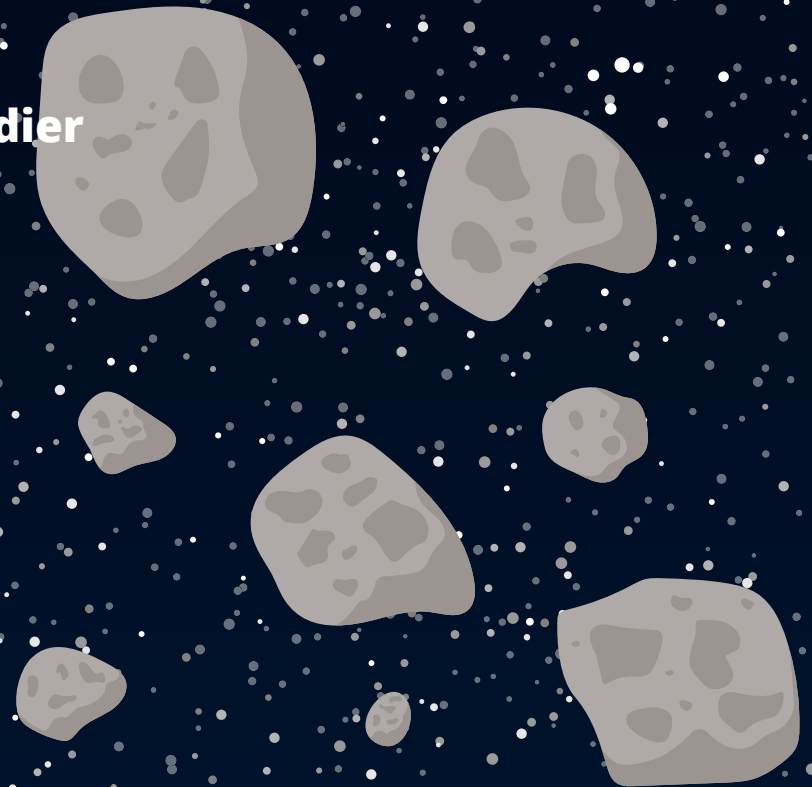

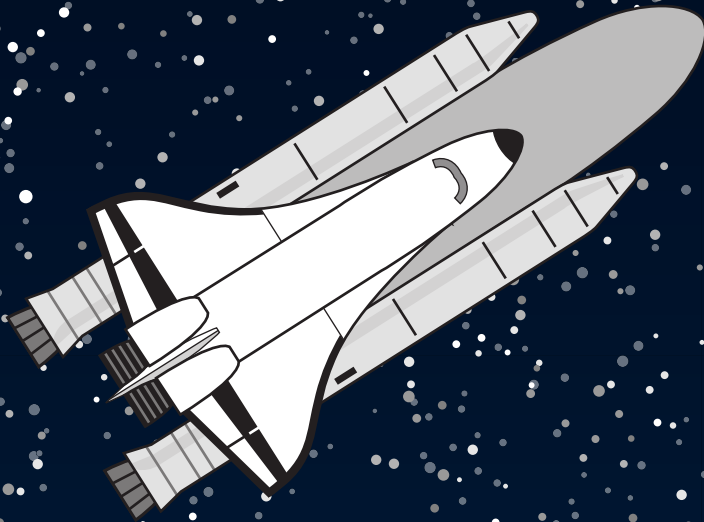

"My signal senses there is a life form. It looks like it is on one of the asteroids in the asteroid belt close to Earth." announced Gizmo.

Captain called out, "We have to go to the asteroid."

They flew to the asteroid.

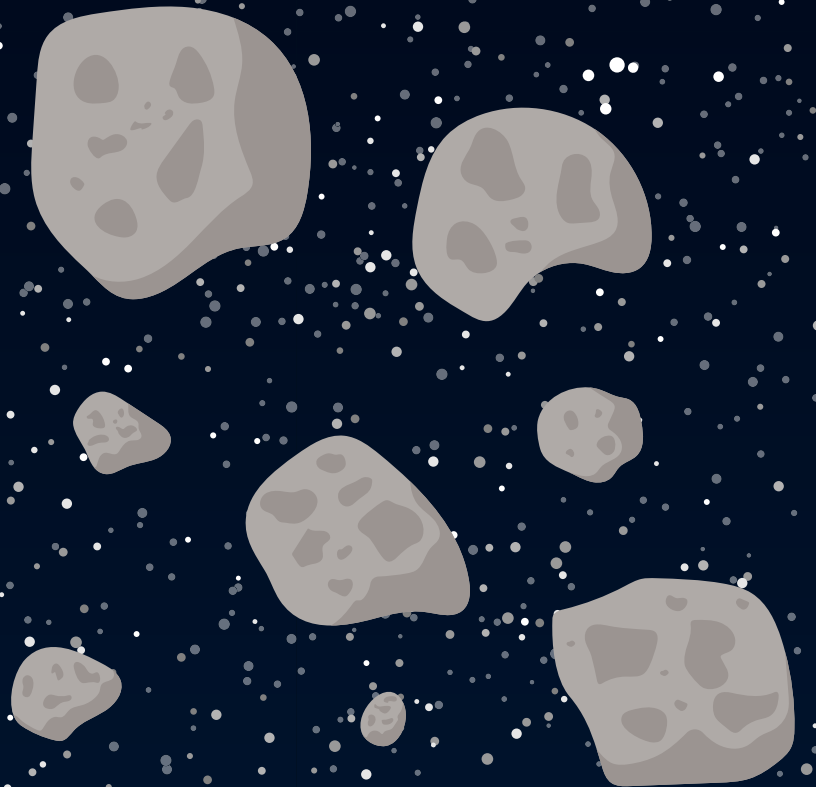

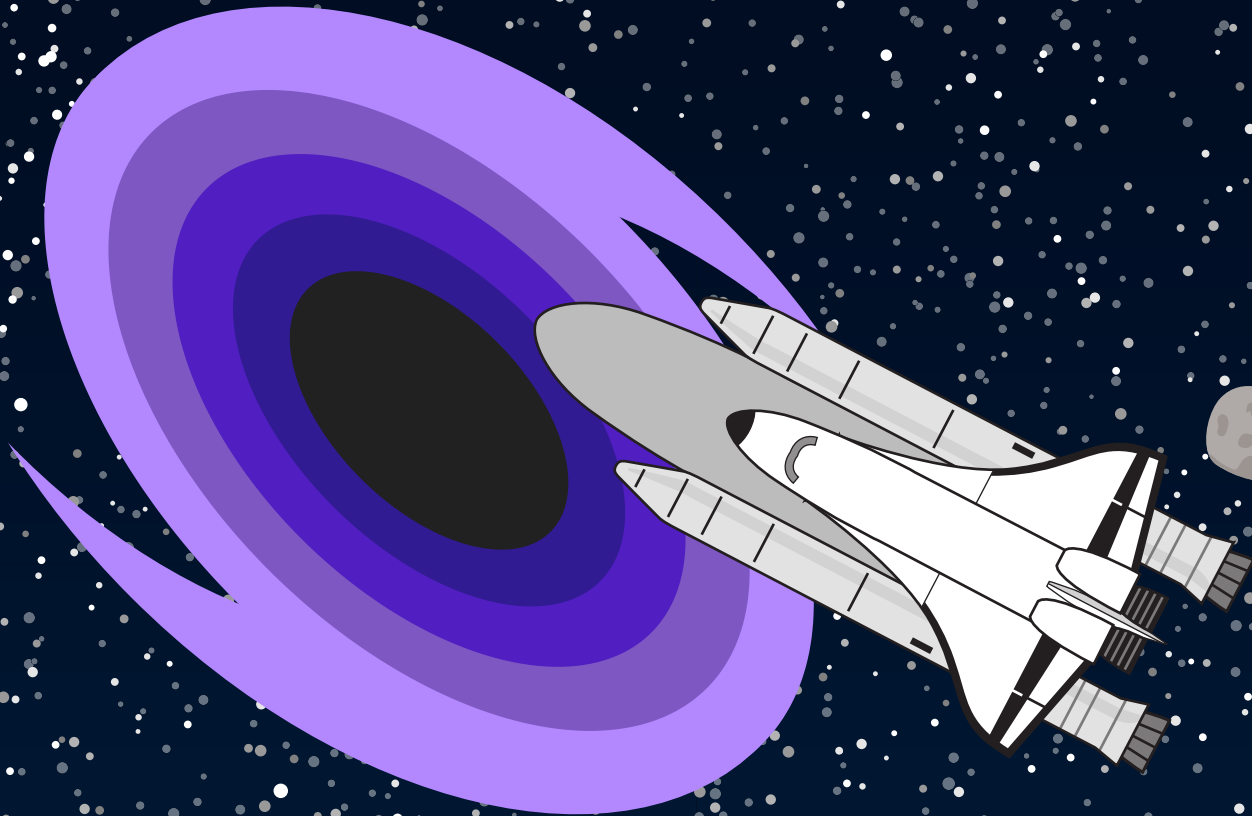

Captain and Gizmo collected the lost soldier and put him on the ship.

The ship was on its way back to Earth.

"What?! It is a time-worm!" said Gizmo.

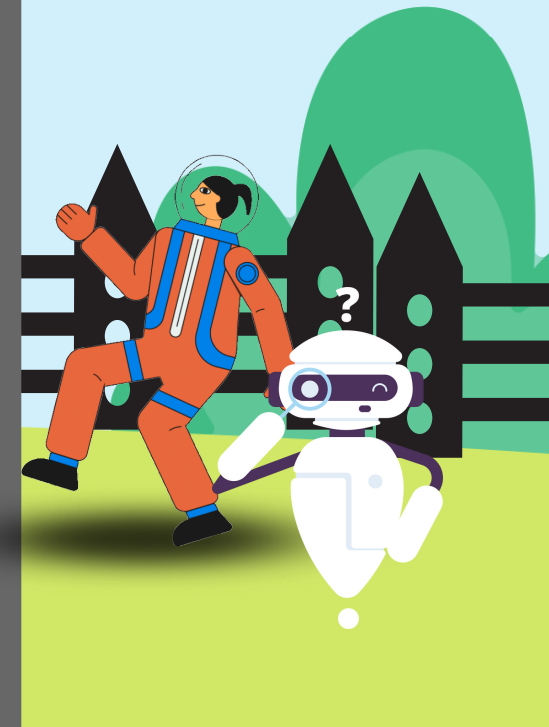

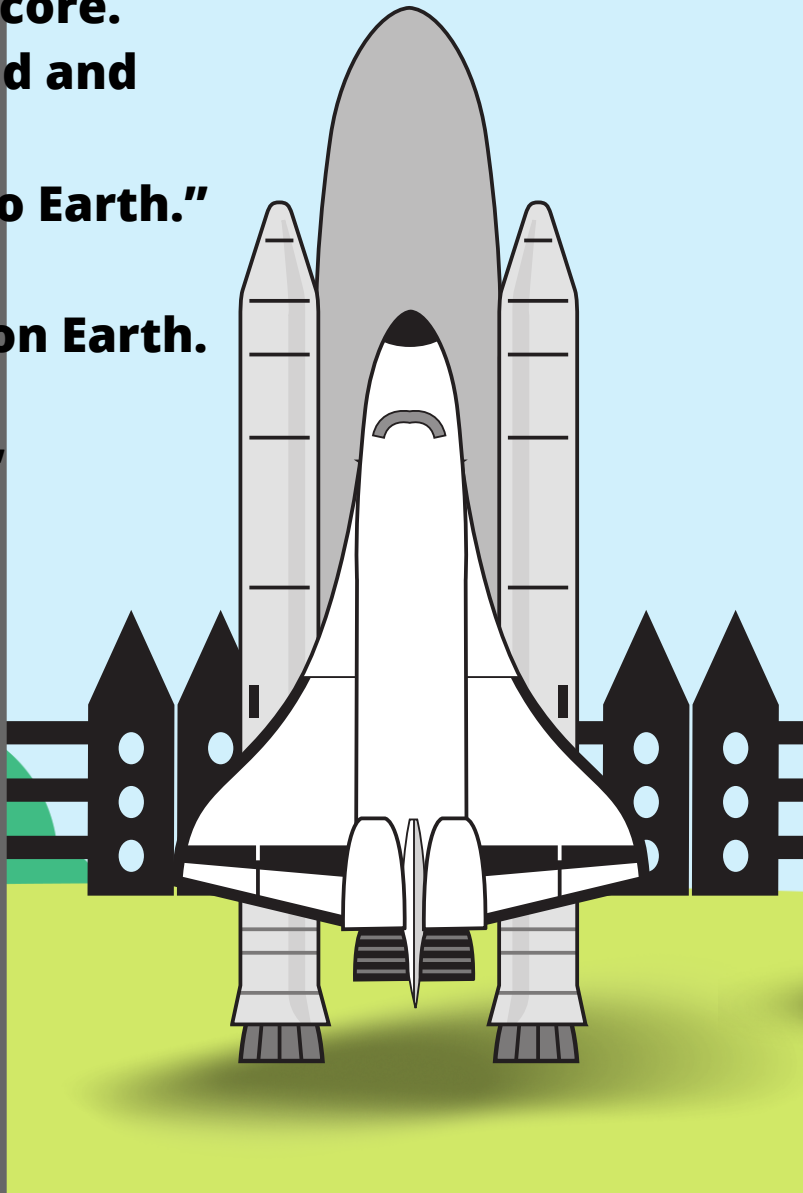

"Turning on hyperspeed. Ok, hyperspeed is on. We're in another dimension."

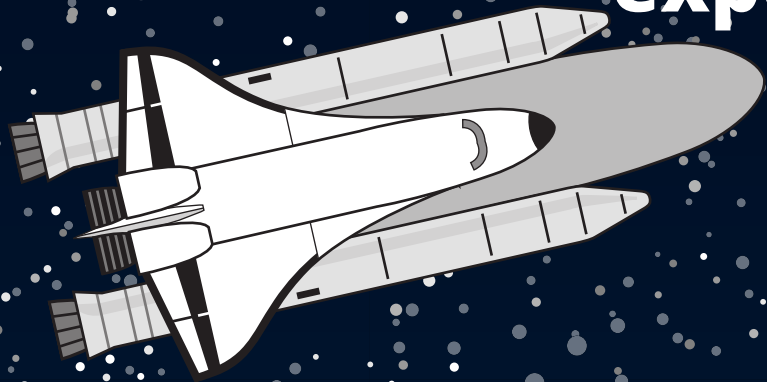

"We do not have enough juice to get back to Earth." announced Gizzmo. The soldier said, "There is some hyper fluid on the asteroid. Looks like the asteroid has some in its core. They went to the asteroid and collected the fluid. Now we are heading back to Earth."

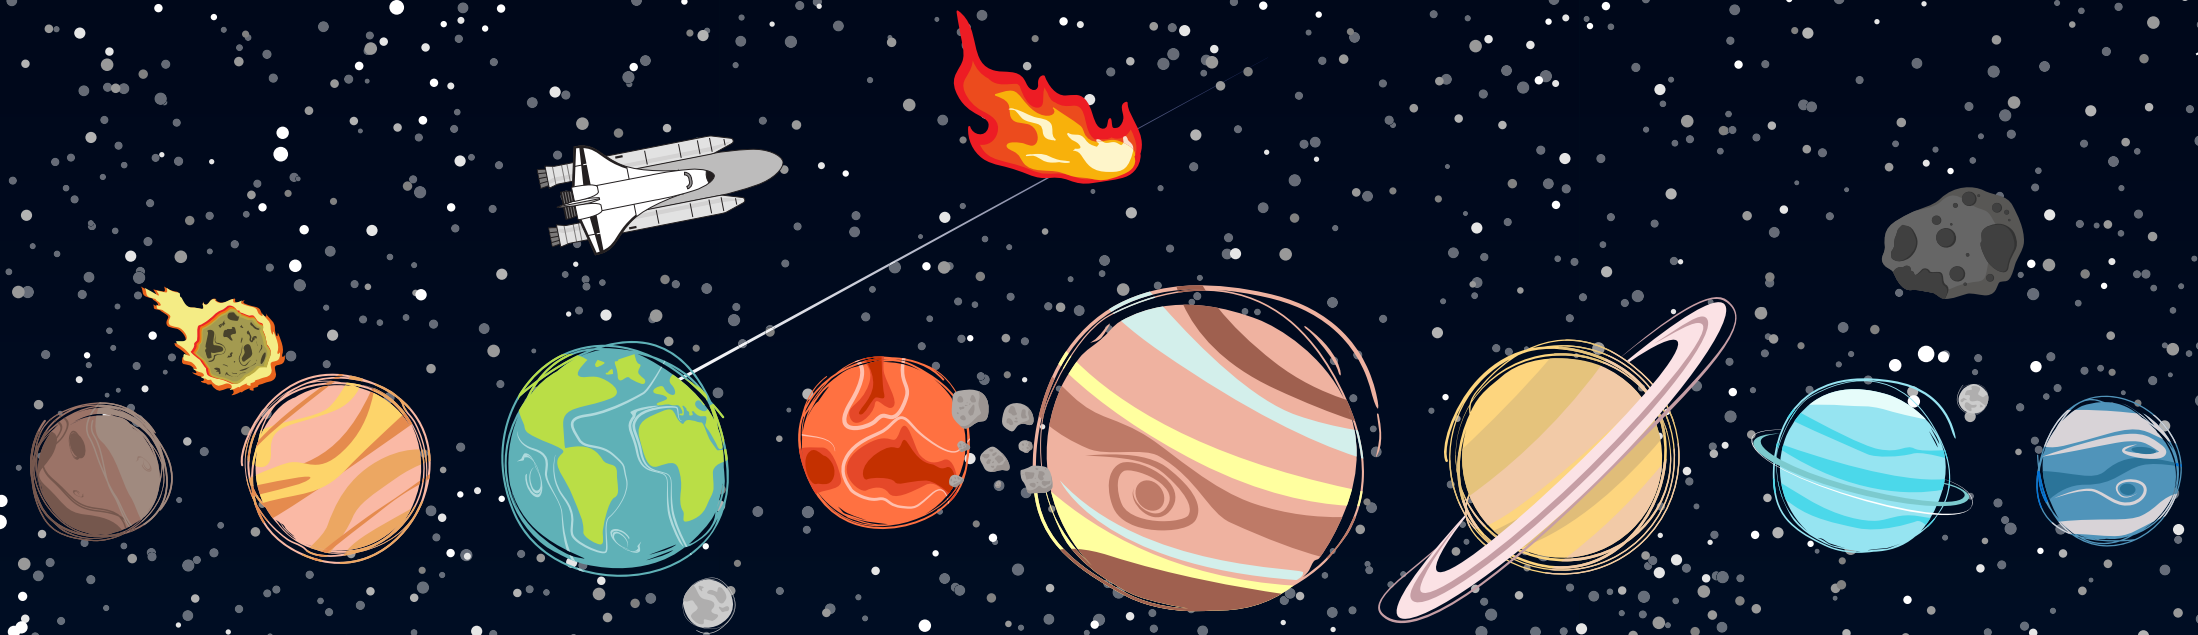

24 hours later they landed on Earth.

"Good job, Soldier."

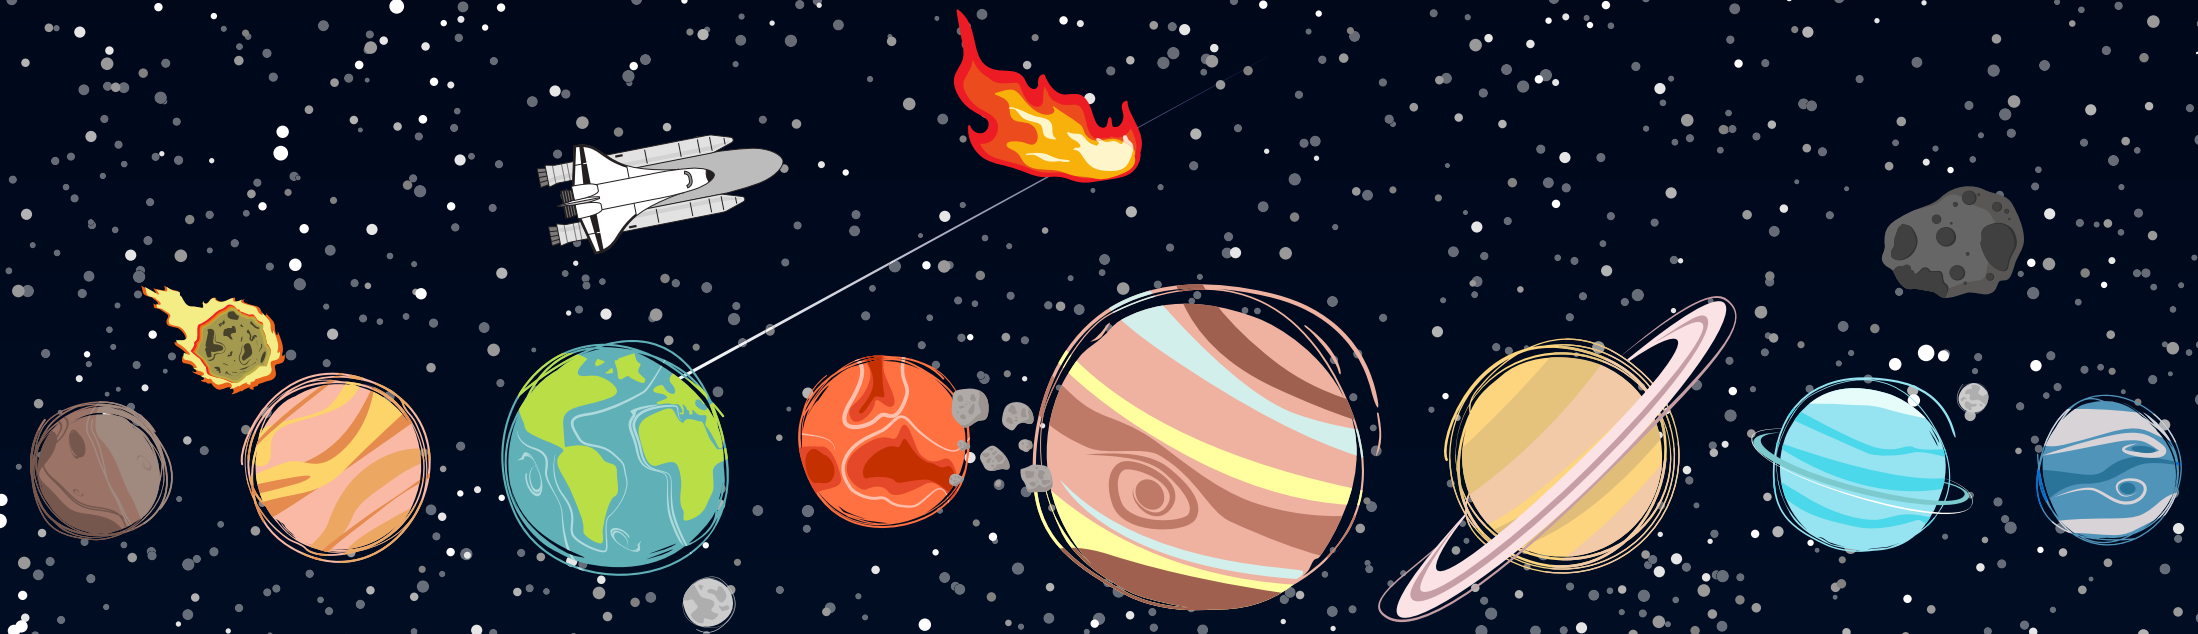

Hi, my name is Charlie . I'm 12 years old. I live in Australia with my family. I loved reading books. I really don't care what type of book it is but I have always enjoyed reading about space. In my spare time I mostly play computer games. When I was younger I enjoyed going to the barbers and I want to give the same experience to others.

In this book Captain and some one later
on in the Book tries to find the lost
Soldier read on to see if they find him
stay continue to find out
